

"Browser" Read-Me

Before Playing Browser

1) To use the Artropolis '97 Browser CD-ROM you need to install ImageAXS CD on your computer. Double-click the file named "laxscd32" on the CD-ROM to launch the installer. The installer will guide you through the process.

2) You also need to have QuickTime for Windows installed on your computer. If you don't have a recent version, open the "QT_INST" directory on the CD and double-click the "QTEASY32" file to install v. 2.1.2. The installer will guide you through the process.

Playing Browser

1) Double-click the "Artropolis 97" file on the CD.

You can quit at any time by pressing Ctrl-Q while in the interactive presentation. Alt+F4 will quit the Browser database and return you to the interactive .

2) You can also open the Browser database directly in two different ways:

Double-click the file named "Browser" on the CD-ROM.

OR

Start the ImageAXS CD program and then choose "Open Collection" under the "File" menu. Use the dialog box to navigate to the "Browser" file on the CD-ROM, and choose "Open."

3) The recommended colour depth for your monitor is 16-bit (high colour).
