The software on this CD-ROM, ImageAXS-CD, is a read-only version specially designed by Digital Arts & Sciences to enable people to distribute their image content on CD-ROM. If you have content which you would like to distribute, please contact Digital Arts & Sciences, at the number listed below for more information on our Authoring Kit.

Additionally, we also sell several versions of a full read/write implementation of ImageAXS which can be used by individuals or companies that want to manage their own content. The first version, called ImageAXS, simply adds the ability to acquire images, and add and edit text to the already powerful search capabilities you have found in ImageAXS-CD. The second version, ImageAXS Pro, adds a number of additional features:

- Over 100 fields per record
- Date/Time and Numeric fields as well as Alpha
- HTML export*
- e-ZCard export (Create electronic mini-albums for distribution).*
- Open multiple collections at once
- ODBC compliant

For further information on either ImageAXS, ImageAXS Pro, or the Authoring Kit please call our sales line at 800-449-6220, send e-mail to sales@dascorp.com, or visit our Web Site at www.dascorp.com.

* Available only in the 32 bit version.
