CRIBBAGE UPGRADE

There is now a help function that works, and also something I realised after uploading the file, has been fixed. I never got round to doing the Hard level at pegging, it was identical to the moderate level. Not so anymore.

Simply add the file CRIBHELP.OPA to the CRIB directory, and replace the CRIBBAGE.OPA file.

Let me know if you manage to beat the Psion regularly on any level other than easy.

Yours,

Zooey.

More software on its way soon.....
