conditions (1) or (2).
Fred Fish has permission to distribute this program in his collection
of PD and Shareware programs.
Others will have to ask for permission.
This is a limited version, if you want to be the proud owner of the full
version of the program and amuse yourself for hours with boring data
from your favourite countries what you have to do is @{ " register " link w2 }
You won't regret!

## 1.3 WorldMap 1.0. Registration

To register your copy of WorldMap switch on your printer and double-click
the icon named 'Registration.print', fill it out and send it to me along an
euro-cheque,postal money order or cash. Don't send stamps, war bonds or
Eurodisney discount coupons. (Does it sound greedy enough ?)
Don't even try to send bank drafts or private checks unless you are
disgustingly rich, 'cause commissions are very high.
The preferred way is of course the following one:
Just stuff those notes in an envelope and send it straightaway and
keep smiling in confidence that your postal service is better than Correos
(Spain) or Royal Mail(UK), I know both and I can tell you that anyone
of them is as much as trustable as the other one.
If you don't have a printer send a letter with your name and address to:
Santiago Hernández Blasco 1.0
C/ Ramiro I No 24 , 3ºA
Zaragoza 50010
SPAIN
The registration fee is UK £15 or Pesetas 3000 (Do you remember those
green notes you didn't spend on paella the last time you visited Costa del
whatever? Well, you do, don't you? Then send them in)
If you can't send UK£ or Spanish Ptas. Send the equivalent amount (or more)
in an European Union-friendly currency.(US$ also welcomed)
What do I get if I register?
After registering you will receive the latest version of the program with
updated information and maps on MORE countries and continents.
NOTE

I’m just starting my military service period (It’s compulsory in Spain, I don’t like it but I have to do it), and I don’t know if I will have time to answer everybody quickly enough,(if there is anybody anyway...) what I can tell you is that I will send you the update (sooner or later), I will be through by Summer’95, Everything you send before August will be replied as soon as possible, whenever it will be.

## 1.5 WorldMap 1.0 Install

If you are reading this, you already have the program installed.
Simply don’t move directories from where they are.
If you want to place the program in another dir just drag the drawer called WorldMap where you want to keep it.

## 1.6 WorldMap 1.0 The program

You will find two parts, a list and a picture of the map currently being shown.
The list will show two different kinds of information:
A list of the selected countries or
the information corresponding to the current country and its flag (if available).
The main display will show a country (if available), a continent, (if available) or the whole world.

## 1.7 WorldMap 1.0 Menus

Project menu
Save Shows a requester asking for a filename to save the current map as an IFF file.
Print Sends to the printer the contents of the list.
To alter the printout, modify the printer settings in the printer.pref program that you can find in the prefs drawer

of your workbench.

## 1.10 WorldMap 1.0 Search Field

In this field you can type the name of the country you are looking for,
or an approximation,or part of the name, or its capital, official name
or whatever, just try!

## 1.11 WorldMap 1.0 System requirements

There are no reasons why this program shouldn't work on an 1.3 machine,
I haven't tested it, but it should work.
requirements:
Hard drive is recommended (2.5 mb of free space).
1 MB of memory
recommended:
High res monitor supporting any of the non-interlaced modes to avoid
the flicker of the screen.

## 1.12 WorldMap 1.0 The Future

It really depends on you, if you register I will improve it , if you don't
register , I won't.
What are my plans for WorldMap?
- More continents, all of them in fact, (already in development).
- More and more up-to-date statistics, (sugestions are welcomed).
- More powerful search.
- Country comparisons.
- Display actual local time in every country.
- Make it smaller and faster.
- Support for the CD32 controller.
- Others you may suggest.

## 1.13 WorldMap 1.0 Do it yourself

Worldmap is an open program. you can add your own countries, information
and data in a very easy way.
The only thing you have to do is place the files you have created in the
right drawers.
Adding Country pictures
Let's imagine we want to add a country called United Kingdom to the program
so we create a pic in Dpaint (of the map) with the palette provided
(palette.worldmap), then we call it 66.country, being 66 the number
of the country.
You can also find this list in the DIY directory.
See @{ " list of countries " link w13 }
then we place it in the drawer called 'pics/numberofcontinent' being 1
the number of continent of the United Kingdom, so the complete path would be
...worldmap/pics/1/66.country
the continent numbers are
Europe 1
Africa 2
South West Asia 3
Australia 4
North America 5
Central America 6
South America 7
Eastern Asia 8
Southern Asia 9
The dimensions of the pic must be:
632x354x8colors using palette.worldmap
If what you want is add more written information simply edit or
create XXX.tex, being XXX the number of the country and place the text file
(Plain ascii file, you can create it in any text editor v.g. MEmacs in the
tools directory of your workbench) in the data directory
Data/XXX.tex
...WorldMap/Data/66.tex
You can also add or modify the flags in the same way, this time the files are
Brushes/XXX.flag
...WorldMap/Brushes/66.flag
same palette, you will find a few flag templates in the DIY directory
You can see a complete example of this in number 204 (Spain)
Feel free to add any country you like, the only condition is that you send
me a copy of the files so I can include it in forthcoming updates, ) Please
indicating the date of the information. I also will welcome any information
that updates what I already have.

## 1.16 WorldMap 1.0 Author & Acknowledgements

Acknowledgements , I love this word, I can’t pronounce it but I love it.
How do the Germans say ’acknowledgements’ it must take a couple
of lines at least.
Thanks to:
Greg Payne for his wonderful icons (IconPlus_1,2 &3) Just forget MagicWB
icons and get these instead. WorldMap 8-colour icons are part of his
collection and they look great in my 1942 monitor (AGA DBLPAL No flicker)
The wb palette to see them properly is included somewhere, try it!
From MagicWB you can use XEN.font which is a very good Non-proportional font
But remember that you have to register with the author if you use it.
Wolfgang Lug for the idea
I have used the same numbers for the list that wolfgang used, which I guess
are the result of sorting the countries alphabetically in German.
I also want to thank the following people without whom I could have not
possibly done this program:
R.E.M. Automatic for the People
Pearl Jam ten
Nirvana Nevermind
The Waterboys The best of.. ’81-’90
Lenny Kravitz Mama said
Radio Futura Escuela de calor
Cristina y los Subterráneos
