

LIBRARY HELP FILE

The display shows the library consisting of a hundred **books** on ten **shelves**.

The shelves

Each **shelf** contains ten **books**. The **books** on each **shelf** cover a subject area as described by the text on the left of the **shelf**.

During the test and tutorial you start with the books on the left and progress to the right.

The books

Each **book** corresponds to a single topic. This topic is displayed under the bottom **shelf** when the mouse pointer is on the **book**.

The **books** are colour coded as follows:

A **blue book** is one which you have not yet viewed.

A **red book** is one which you have viewed.

The **yellow book** is the last book you that viewed in the current session. (The **yellow book** will not be shown if you have not yet viewed a **book** in the current session.)

How the library works

While you are in the library, you can choose any one of the hundred **books** to read without having to answer questions on it (unlike the tutorial). Click on the **book** you want and it will be displayed.

After reading a **book**, you can return to the library **shelves** to choose another. Alternatively, you can browse adjacent **books** without returning to the library **shelves** by using the on-screen direction arrows. (Look at the help file associated with reading a book.)

Help

Click on the **HELP** button to display this help file.

Exit

Click on the **EXIT** button to return to the *Main menu*.
