

CONFIGURE HELP MENU

Hints

Hints appear at the start of the *Main menu*. These are disabled by clicking *Hints ON* which then changes to *Hints OFF*. Hints can be enabled again by clicking on *Hints OFF*.

Speech

Speech samples are contained on the CD of later versions of *Know Your Stuff (versions 2.0 and above)*. These can be copied onto the hard disk so they can be used with *Know Your Stuff* CDs that do not have speech samples.

Providing you have room on your hard disk (the samples require about 10 MB) it is advisable to copy the speech samples onto the hard disk because access is usually faster. These can easily be removed later if desired (see below).

To copy the speech samples, simply click on *Speech - CD* and follow instructions.

To remove the speech samples after they have been copied, simply click on *Speech - hard disk*.

Know Your Stuff will run perfectly well without the speech samples.

Video

Animated video sequences are on all the versions of the *Know Your Stuff* CDs. However, later versions of *Know Your Stuff* (versions 2.0 and above) contain improved sequences. These can be copied onto the hard disk and will then automatically be used with earlier versions of *Know Your Stuff*.

Providing you have room on your hard disk (the sequences require about 30 MB) it is advisable to copy the video sequences to the hard disk

because they will usually run faster. These can easily be removed later if desired (see below).

To copy the sequences click on [Video - CD](#) and follow instructions.

To remove the sequences click on [Video - hard disk](#).

If you preferred the earlier sequences, you can copy these onto the hard disk in the same way and use them with the later versions of ***Know Your Stuff***.

If the sequences are not copied to the hard disk, then the sequences on the current CD are used.
