

Pentium® OverDrive® Processor System List

January 1997

The following is a preliminary list of Pentium® processor-based systems which the respective manufacturers have reported are designed to be upgradable with Pentium OverDrive® processors. Intel is continuing to gather system information and conduct compatibility testing to expand this list.

Please note that the list is updated on a weekly basis on the web, and will grow as more systems are tested. If you require upgradability information on a system that does not appear on this list, please check www.intel.com or contact the system manufacturer.
