

CNN NEWSROOM Global View

The Video World Affairs Atlas on CD-ROM with WORLDCLOCK

In The **CNN NEWSROOM** "studio" select video essays from the simulated video monitors and see CNN's most compelling coverage of important global trends - specifically edited for your computer monitor. ***More than one-hour of narrated video to listen and watch.***

Explore different points-of-view from articles, charts and maps drawn from worldwide publications - hundreds of commentaries by leading authorities, transcripts of speeches by world leaders, pro- and-cons and analyses from international newspapers and magazines - unique perspectives from around the world. Includes an exclusive index to **CNN NEWSROOM** daily classroom broadcasts and teaches guides.

Select the **ATLAS** and zoom in on detailed maps of every country and region. You'll have hundreds of full-color maps at your fingertips - with the location of each country highlighted on the reference globe.

Get complete descriptions and data from authoritative sources on every country and region - people, politics, economy, military, resources. Examine information and analyze trends from a unique database of world statistics. Then build your own color charts and graphs to display your results using powerful graphics tools - six different formats - line, range, bar, scatter, horizontal bar and pie charts.

Select **WORLDCLOCK** and display the current time and pattern of sunrise and sunset any place on earth or show the complete world view with all international time zones. Measure distances between any two points on the globe and check any location's latitude and longitude.

Use the **CALENDAR** to keep your daily schedule and reminders - a complete daybook and memo pad that will store and print your current and future appointments.

Leave the unique, beautiful, full color spinning globe on your monitor and you'll have the world's best screen saver.

CNN NEWSROOM Global View is currently available for DOS - ***coming soon for Windows!***
