

2.BAT: Old versus New

Command	Old version
2 .	Goes to the root directory of the current drive
2 ..	Goes to the root directory of the current drive, reports "Invalid directory"
2 D	Goes to the root directory of D:
2 TEMP	Goes to the TEMP directory in the root directory

New version

Stays in current

directory, like "CD ."

Goes to the parent of the
then current directory, like
CD ..

Goes to the D directory in
the current directory if
it exists; goes to the current
directory of D: otherwise

Goes to the TEMP directory
in the current directory
if it exists; goes to the TEMP
directory in the root
directory otherwise
