Minimum System Requirements

Mac OS

- PowerPC-based Mac OS-compatible computer

- PowerPC-based system: Mac OS 8.6, 9.0, 9.04, 9.1, or Classic mode of OS X

- LaserWriter printer driver version 7.0 or later

- CD-ROM drive (or access to a CD-ROM over a network) for installation

- 14MB free RAM (with virtual memory turned off)

- Available hard disk space for full installation of QuarkXPress Passport: 14MB

Windows

- 486 or faster processor.

- Microsoft® Windows 95, Windows 98, Windows NT 4.0, Windows ME, or Windows 2000

- CD-ROM drive (or access to a CD-ROM over a network) for installation

- 12MB total RAM (additional memory recommended for graphic-intensive documents)

- Available hard disk space for full installation of QuarkXPress Passport: 14MB

Installing QuarkXPress Passport on Mac OS

1 Disable any virus protection software. If you are concerned about a virus infecting your computer, use virus protection software to check your hard drive and the discs provided by Quark.

2 Use an extensions manager to disable non-essential system extensions. Do not disable system extensions or control panels required for accessing the CD-ROM drive.

3 Restart the computer.

4 Insert the CD-ROM into your computer or mount the QuarkXPress Passport CD-ROM over the network.

5 Open the "QXP PP 5.0 Beta" folder, then open the "Validation Code" document. Copy the validation code displayed; you will be asked to enter this code during the installation process.

6 In the "QXP PP 5.0 Beta" folder, double-click the **QuarkXPress Installer** icon. The **QuarkXPress 5.0 Installer** screen displays.

7 Click **Continue.** The **License Agreement** screen displays. Read the **License Agreement** carefully. If you accept the terms in the agreement, click **Accept.** If you do not accept the terms, click **Decline.**

NOTE If you do not accept the terms of the license agreement, you will not be able to install QuarkXPress Passport.

8 If you clicked **Accept**, the **Software Verification** screen displays. Enter the **Validation Code** you copied in step 5, above.

9 Click **OK.** The **Customer Information** screen displays. Enter your information in the required fields. Click **Next.**

10 An alert displays, showing you how your information will appear on mailing labels. If the information is incorrect, click **Previous** to return to the **Customer Information** screen and enter the correct information. If the information is correct, click **Next.** The **Installation Type** screen displays.

• Choose **Complete Install** from the pop-up menu if you want to install all the program files. This option takes the most disk space. For a list of all the program files, see the ReadMe file on the QuarkXPress Passport CD-ROM.

• Choose **Custom Install** from the pop-up menu if you want to install only selected program files. This option is recommended for experienced QuarkXPress Passport users.

11 If you chose **Custom Install**, the **Custom Install** list displays. Click a disclosure triangle to see individual files. If you want a file to be installed, check the box next to it. Only checked items will be installed. To see a description of the file, click the **I** button after its name.

NOTE QuarkXPress Passport may install required files that are not displayed in the **Custom Install** list.

12 The **Install Location** area at the bottom of the screen displays the path to the folder or volume where QuarkXPress Passport will be installed. If you want to install QuarkXPress Passport in another location, choose **Select Folder** from the **Install Location** pop-up

menu. Navigate to the desired folder; click **Select** when done. You will return to the **Installation Type** screen.

13 When you have selected the files you want to install and verified the location where QuarkXPress Passport will be installed, click **Install.**

14 As items are installed, the **Installing** status bar progresses from empty to full. When all items are installed, an alert will display: "Would you like to register QuarkXPress online?" Click **No.**

15 An alert displays: "The software was successfully installed." Click **Quit.**

Adding Files After Installation

1 Repeat steps 1–9 in "Installing QuarkXPress Passport on Mac OS." The **Installation Type** screen displays.

2 To install additional files, choose **Custom Install** from the pop-up menu. The **Custom Install** list displays. Click a disclosure triangle to see individual files. If you want a file to be installed, check the box next to it. Only checked items will be installed. To see a description of the file, click the **I** button after its name.

NOTE QuarkXPress Passport may install required files that are not displayed in the **Custom Install** list.

3 Click **Install.** When the QuarkXPress Passport files are installed, an alert displays: "QuarkXPress has been success-fully installed." Click **OK.**

Topics

Installing QuarkXPress Passport on Windows

1 Disable any virus protection software. If you are concerned about a virus infecting your computer, use virus protection software to check your hard drive and the disks provided by Quark.

2 Remove any installed versions of QuarkXPress Passport. If you use the Windows Uninstall feature to remove earlier versions of QuarkXPress Passport after installing QuarkXPress Passport 5.0, some files will be incorrectly removed and QuarkXPress Passport 5.0 will not operate correctly.

3 Restart the computer.

4 Insert the CD-ROM into your computer or mount the QuarkXPress Passport CD-ROM over the network.

5 Double-click "Setup.exe." An alert displays, informing you that the system is being configured. When the configuration is complete, you will be prompted to restart your computer.

6 The Quark **Welcome** screen displays.

7 Click **Next.** The **Software Verification** screen displays.

8 Click **Next.** The **License Agreement** screen displays. Read the License Agreement carefully. If you accept the terms in the agreement, click **Accept.** If you do not accept the terms, click **Decline.**

NOTE If you do not accept the terms in the License Agreement, you will not be able to install QuarkXPress Passport.

9 If you accepted the terms of the License Agreement, click **Next.** The **Customer Information** screen displays. Enter your information in the required fields.

10 Click **Next.** The **User Registration Information** screen displays. Enter your information in the required fields.

11 Click **Next.** The **Destination Folder** screen displays, showing the path to the folder where QuarkXPress Passport will be installed. Click **Change** to navigate to a different folder.

12 Once you have selected a folder, click **Next.** The **Setup Type** screen displays.

• Check **Complete** if you want to install all the program files. This option takes the most disk space.

• Check **Custom** if you want to install only selected program files. This option is recommended for experienced QuarkXPress Passport users.

13 If you clicked **Custom,** the **Custom Setup** screen displays. Click a disclosure box to see individual files. Click on a file to see its description in the **Feature Description** area. Click the pop-up menu next to each file name and choose an option:

• This feature will be installed on local hard drive.

• This feature and subfeatures will be installed on local hard drive.

• This feature will be installed when required.

Topics

• This feature will not be available.

(A feature may not display every option.)

If you want to know how much disk space you have before you select files to install, click the **Space** button. The **Disk Space Requirements** screen displays. You can view how much space is available on the selected drive, and how much space is required for the files you have selected. Click **OK** after reviewing this screen; you will return to the **Custom Setup** screen.

NOTE QuarkXPress Passport requires that certain files be installed; you will not be able to deselect them.

14 The **Install to** area at the bottom of the screen displays the path to the folder in which QuarkXPress Passport will be installed. If you want to install QuarkXPress Passport in another folder, click **Change** to display the **Change Current Destination** screen. Navigate to the desired folder; click **OK** when done. You will return to the **Setup Type** screen.

15 When you have selected the files you want to install and verified the location where the QuarkXPress Passport folder will be installed, click **Next.** The **Ready to Install the Program** screen displays.

16 Uncheck **Run Online Registration After Installation**.

17 Click **Install.**

18 When QuarkXPress Passport is installed, the **Installation Wizard Completed** screen displays. Click **Finish.**

NOTE The eBook Export XTensions module is not included in the QuarkXPress 5.0 beta software. If you are interested in testing the eBook export capability, download this XTensions software from the Quark Web site. (<http://www.quark.com/support/downloads/index.jsp>)

Adding and Removing Files After Installation
1 Repeat steps 1–4 in "Installing QuarkXPress Passport on Windows."

2 Double-click the "Setup.exe" file on the QuarkXPress Passport CD-ROM. The Quark **Welcome** screen displays.

3 Click **Next.** The **Program Maintenance** screen displays. Click a radio button:

• **Modify** allows you to change which QuarkXPress Passport files are installed. You can install new files or remove previously installed files. Use this option to add files after your initial installation.

• **Repair** fixes minor problems related to QuarkXPress Passport files, such as missing shortcuts or files. Use this option if you are having problems with missing or damaged QuarkXPress Passport files, shortcuts, or registry entries.

• **Remove** will remove all installed QuarkXPress Passport 5.0 files from your computer. Use this option when you are installing new system software, or before reinstalling QuarkXPress Passport.

QuarkXPress Passport 5.0 Beta ReadMe — Confidential Information
Installing QuarkXPress Passport on Windows (continued)

QUARK™

4 Click **Next.** If you clicked **Modify** in the previous screen, the **Custom Setup** screen displays. Repeat step 13 of "Installing QuarkXPress Passport on Windows," then click **Next.** The **Ready to Modify the Program** screen displays. Check **Install** to make your changes.

If you clicked **Repair** in the previous screen, the **Ready to Repair the Program** screen displays. Click **Install** to begin repairing program files.

If you clicked **Remove** in the previous screen, the **Remove the Program** screen displays. Click **Remove** to remove QuarkXPress Passport 5.0 files.

5 When the QuarkXPress Passport files are installed, repaired, or removed, the **Installation Wizard Completed** screen displays. Click **Finish.**

Topics

Installing and Uninstalling Issues

Windows

The QuarkXPress Passport for Windows installer will overwrite existing QuarkXPress Passport registry entries. After installing QuarkXPress Passport testing software, double-clicking on any QuarkXPress document will launch QuarkXPress Passport 5.0 testing software. To restore the original registry entries, double-click the "passport.reg" file in the original QuarkXPress application folder.

NOTE Double-clicking the "passport.reg" file in the original 4.x or 3.x QuarkXPress folder while QuarkXPress Passport 5.0 is installed will disable the Windows **Add/Remove** function for QuarkXPress Passport 5.0.

Known Issues

Thank you for participating in the QuarkXPress Passport 5.0 Beta Testing Program. As you know, pre-release versions of QuarkXPress Passport 5.0 do not represent commercially released product or materials, and may contain defects and errors that could cause problems such as system failures or loss of data. Therefore, we recommend caution in using this software in production workflows. Following are some known issues with this build of QuarkXPress Passport pre-release software; we are working toward fixing these and other issues in future releases:

- When you press Option (Mac OS) or Alt (Windows) to update the document version while opening a QuarkXPress Passport 4.11 document, text hyphenation may not update correctly to 5.0 hyphenation.

- If you attempt to create a rollover for a Bézier picture box, the computer may stop responding.

- When **Overprint EPS Black** is checked in the **Print** dialog box **Options** tab, pictures saved in Adobe® Illustrator 9 may output with knockouts.

- You may encounter numerous problems when attempting to perform actions with anchored groups of boxes.

- You may encounter certain problems when working with hyperlinks in cross-platform documents.

- Closing a book while a chapter of the book is open on another computer may cause QuarkXPress to crash.

- A read-only book can only be opened by changing it to a non-locked file.

- Opening any QuarkXPress 3.x or 4.x document directly in QuarkXPress 5.0 works correctly. However, if you want to load an *XPress Preferences* file from QuarkXPress 3.x or 4.x, you must place it loose in the QuarkXPress application folder; It will not load if you place it in the "Preferences" folder within the QuarkXPress application folder.

- Changes to the Hyphenation Preferences for 'German (Reformed)', Portuguese, and Hungarian will not be honored when opening a 3.x or 4.x document in QuarkXPress 5.0. The methods for the three languages will remain blank. Workaround: You may perform a thumbnail drag to a new 5.0 document and set these options.

- *Mac OS only:* If you edit the **Target** field for a hyperlink (**Style ➤ Hyperlink ➤ Edit**), and then subsequently preview or export the Web document, QuarkXPress may stop responding.

- *Mac OS only:* If you edit a rollover on a master page, the computer may stop responding.

- *Mac OS only:* Previewing or exporting a Web document may cause the computer to stop responding if the **Target** field for a hyperlink has been edited (**Style** ➤ **Hyperlink** ➤ **Edit**).

- *Windows only:* Using Super Step and Repeat to duplicate a text box containing an anchored table may cause QuarkXPress to stop responding.

- *Windows only:* Changing the **Language** for selected text (**Style** ➤ **Formats** ➤ **Language** pop-up menu) may cause QuarkXPress Passport to stop responding.

- *Windows only:* When working in a document containing a table on a master page, QuarkXPress may stop responding after modifying the master page table on a document page.

- *Windows only:* Relative paths for hyperlinks created in QuarkXPress for Mac OS may not work correctly in QuarkXPress for Windows.

- *Windows only:* In avenue.quark™, resizing the Preview XML window requires a longer length of time than normal to draw the resized window.

Compatibility Issues

- You may experience compatibility issues between third-party software and QuarkXPress 5.0.

- *Mac OS only:* Saving a document from OS X Classic to a Windows 2000 server in Classic OS X format can damage the document. To resolve this problem, update the OS version to 10.1.
