

TRADER'S animated cursors

Here are some animated cursors I created... Hope you enjoy them!!

Installation Guide

- (1) These cursors need to be installed into your Finder with a resource editor like ResEdit. You should install them on a copy of Finder, because an error (OOPS!!) in ResEdit can be nasty...
- (2) In ResEdit, open the desired cursor file, and open the 'CURS' resource to see what the cursor will look like.
- (3) If you like the cursor, highlight both the 'acur' and 'CURS' resource. Both are needed, because the 'acur' resource contains the necessary information to animate the cursor. Note: If your watch cursor hands don't move --- this cursor won't either.
- (4) Choose COPY from the EDIT menu so that the resources are copied into the resource editor clipboard. Close the cursor file.
- (5) Open the Finder (should be a copy, NOT THE ONE IN YOUR SYSTEM FOLDER!!) and choose CLEAR from the EDIT menu for the 'acur' and 'CURS' resources. Choose PASTE from the EDIT menu so that the 'acur' and 'CURS' resources from the desired cursor file are copied into the Finder.
- (6) Close everything. If everything went smoothly, you can now copy the edited Finder into your System Folder and use the new cursor. Reboot and your cursor should move...
