

The Barry Press Utilities for Microsoft Windows Windows 3.1 Release

Summary

This archive contains a set of utilities for Microsoft Windows, version 3.1 or later. All of the utilities have been compiled for 286 or higher processors. The utilities include the following files in addition to this README file:

Length	Date	Time	CRC-32	Name
-----	----	----	-----	----
14256	03-09-92	23:25	0520ab02	CALPOP.EXE A simple calendar showing any month from January 1980 through December 2037.
1920	04-04-92	18:01	c992d5ef	CALPOP.WRI Documentation for CALPOP.EXE
18800	04-04-92	16:19	06747ce3	RUNNER.EXE A simple Windows/DOS command line accessible from an icon.
9676	04-04-92	17:33	f525859f	RUNNER.HLP Windows help file for RUNNER.EXE.
1920	04-04-92	17:39	b55f84e0	RUNNER.WRI Documentation for RUNNER.EXE
50208	02-16-92	17:17	d02ee2e6	MATCH.EXE A text file comparison program. The executable contains versions for both DOS and Windows.
41442	09-28-91	22:06	871e89e1	MATCH.HLP Windows help file for MATCH.EXE
2176	04-04-92	18:03	e2d6dbf4	MATCH.WRI Documentation for MATCH.EXE
8960	03-29-92	14:43	bc3c55b4	FLIPPER.EXE An iconic way to display and change the current default printer's orientation from portrait to landscape or vice versa.
2560	03-29-92	14:52	3fffd72	FLIPPER.WRI Documentation for FLIPPER.EXE
12981	09-14-91	12:09	ca38ab1f	PORTRAIT.EXE A program runnable from macros and other scripts to force the current default printer's orientation to portrait.
12981	09-14-91	12:09	1667c9ae	LANDSCAP.EXE A program runnable from macros and other scripts to force the current default printer's orientation to landscape.
2304	04-04-92	18:04	3c0c772f	PORTLAND.WRI Documentation for PORTRAIT.EXE and LANDSCAP.EXE

27143	09-14-91	21:26	82205d67	TIME.EXE	Yet another Windows digital clock.
2304	04-04-92	18:04	3c0c772f	PORTLAND.WRI	Documentation for TIME.EXE
12175	08-17-91	18:19	ce94c86e	MELTDOWN.AD	An add-on module for AfterDark for Windows. Copy it to your \AFTERDRK directory and access it through the AfterDark control panel.
11327	06-20-91	09:15	c68a1f4e	VHOLD.AD	Another add-on module for AfterDark for Windows. Copy it to your \AFTERDRK directory and access through the AfterDark control panel.
29296	04-04-92	11:40	eedf8d7d	HOLDER.EXE	A program launcher. Creates buttons on your desktop you can double click on to start a program. Lets you keep Program Manager as an icon most of the time, saving space on your display.
19889	04-04-92	12:04	b43f82b0	HOLDER.HLP	Windows help file for HOLDER.EXE. Put it in the same directory as HOLDER.EXE.

Installation

The utilities may be installed by copying all of the above files to a directory included in the PATH variable on your machine (except for the two AfterDark modules, which should be copied to your AfterDark directory, usually \AFTERDRK). The files are all independent and may be copied selectively with the exception of MATCH.EXE & MATCH.HLP, and HOLDER.EXE & HOLDER.HLP, which should be copied as pairs. The documentation files (*.WRI) are not required for operation. (Strictly speaking, none of the programs have to be in a PATH directory; it just makes things easier.)

Changed in this version

Aside from fixing bugs and the addition of the Holder utility (see below), the following changes are new in this version:

Several of the utilities have been recompiled to make them noticeably smaller.

CALPOP has been modified to support multiple instances so that you can display multiple months at the same time, and has had a better icon drawn.

MATCH has been modified to accept one or two files

dragged from File Manager and dropped into the window, and to allow the display font and colors to be selected.

RUNNER has been modified to allow applications to be started as icons, and to allow them to be started under control of an alternate shell (e.g., NDOS instead of COMMAND).

----- New in this version ----- Holder

Holder is a Windows application to launch other applications from icon-like buttons placed anywhere on the Windows desktop. Each instance of Holder appears as a button with an icon displayed on the face and the title for the application displayed below the button. Double-clicking on the button with the left mouse button (or hitting the Enter key when the button has the input focus) launches the corresponding application setup on the button. Double-clicking on the title with the left mouse button brings up the Holder system menu.

To get the idea of how to setup a Holder button, follow this procedure to create a button to startup the Windows File Manager:

- * Start Holder. A dialog box will appear asking for a "tag." Type WinFile and mouse on OK (or hit Enter).
- * A larger dialog box will appear. Enter a descriptive title (e.g., File Manager) and a command line (winfile.exe). Mouse on OK at the bottom, or hit Enter.
- * A button with the File Manager icon will appear in the upper left corner of the screen, with the descriptive title below it. Drag the button to its proper location on the screen (hold down the left mouse button, then drag).
- * You can now launch the File Manager by double clicking on the button. Double clicking on the title will bring up the Holder system menu.

Further documentation for Holder can be found in the help file (INDEX in the Holder system menu).

Registration

The entire set of programs and documentation is Copyright 1991-1992 by Barry Press, and are released as shareware. If you use any of the utilities in the collection beyond a two week evaluation period, you are

obligated to send \$20.00 (U.S. funds; cash, check, or money order) to Barry Press, 4201 Empress Avenue, Encino, CA 91436-3504.

Registration licenses a specific user on as many machines as are used solely by that user, or licenses a specific machine (not network servers) for an unlimited number of users. You may copy this software (subject to the \$20.00 registration fee for each user or machine) freely as long as the entire collection is distributed without modification, including this file. Please accompany your registration with the following form so I can contact you regarding updates.

Name: _____

Company: _____

Street/Apt: _____

City/State/ZIP: _____

Country: _____

Computer: _____

Preferred Disk Size: _____

Registration entitles you to notification of updates to the software plus a copy of the next utility added to the collection. The utility currently under development is an application that permits third-party Windows Control Panel applets (such as those to control the channels on your sound card) to be run independently of the Control Panel.

Source Code Availability

Registered users may, for an additional \$75.00 (U.S. funds), purchase a complete copy of the source code and related files for the entire set of utilities. The source has been developed with the Microsoft 6.00a C compiler and Windows SDK. The source code, although it remains the copyrighted property of Barry Press, may be included by purchasers in other derivative programs which are distributed or sold as long as the copyrighted source code is itself neither given away nor sold, and as long as the notice that portions are copyrighted by Barry Press appears clearly in the product.

Disclaimer

No warranties are expressed or implied for this software, including merchantability or suitability for a particular purpose. No responsibility

will be assumed by the author for any loss or damage due to its use.
