WinNAV - Limited Beta Release

This is a special beta pre-release of WinNAV, FlashPoint's Windows Navigator, release 0.60. It has been prepared at the request of several users who wished to preview its new features, and who expressed an interest in beta testing.

It should be used only by experienced PC users, who understand the risks of testing and using pre-release products. This means those who understand that pre-releases have not been fully tested and in all probability, contain bugs. Therefore, you should not use test versions without having up-to-date backups of your drives, or while running important applications or files that could result in unacceptable losses of data resulting from system lockups, unpredictable Windows system errors or crashes -- this is what you should be doing anyway with all software downloaded from local bulletin boards, CompuServe, GEnie, etc.

Warning to Current WinNAV Users

Release 0.60 of WinNAV adopts a new format for the [Run Buttons] section of the WINNAV.INI file. Therefore, you must reinstall any custom Run buttons -- the good news is that they can now be installed directly from the Action:Run dialog panel.

This was required as a result of 0.60 implementation of 36 user defined function key combinations. The first 12 keys (the F1-F12, Shift+Alt combinations) invoke the same applications as appear in both the Run dialog panel and the popup "User" menu; these are identified in the [Run Buttons] section of the WINNAV.INI file by the LB1-LB12 keywords.

The remaining 24 user defined function key combinations are invoked by the Control+Alt+Function Keys (LB13-LB24), and the Shift+Control+Alt+Function Keys (LB25-LB36). These are also setup using the Action:Run dialog Panel.

Quick Start Instructions

New users should simply copy the following files to their main Windows directory (e.g., C:\WINDOWS):

WINNAV.EXE	The WinNAV application
WINQPRT.EXE	The WinNAV print module
WINNAV.HLP	A temporary Windows help file for this pre-release
WNVARC.COM	A utility to extract and load a file within an ARC formatted archive, for viewing. Supports ARC.EXE.
WNVPKA.COM	A utility to extract and load a file within an ARC formatted archive, for viewing. Supports PKXARC.COM.
WNVLZH.COM	A utility to extract and load a file within a LZH formatted archive, for viewing. Supports LHARC.EXE.
WNVZIP.COM	A utility to extract and load a file within a ZIP formatted archive, for viewing. Supports PKUNZIP.EXE.
WINNAV.INI additional	A sample WinNAV configuration file, containing information on configuring WinNAV for your own use

Current users should not copy the WINNAV.INI sample file over their existing WINNAV.INI file, or they will destroy any existing custom configuration information.

In addition, the following third-party shareware applications should be located in a subdirectory that is identified in your DOS "PATH=" statement in your AUTOEXEC.BAT file:

PKZIP.EXE PKUNZIP.EXE	These are used for ZIP archive functions, and are included in the PKWare PKZIP distribution archive.
--------------------------	--

PKZIPFIX.EXE
ZIP2EXE.EXE

ARC.EXE
MKSARC.EXE

These may be used for ARC archive functions, and are included in the SEA ARC distribution archive.

PKARC.COM
PKXARC.COM
PKSFX.PGM

These may be used for ARC archive functions, and are included in the PKWare PKARC distribution archive.

LHARC.EXE

This is used for LZH archive functions, and is included in the LHARC distribution archive.

SCAN.EXE

This is used for the virus scan functions, and is included in McAfee's Virus Scan distribution archive.

CVT.COM
CVT?????.???

These are used by the convert archive format functions, and are included in Starling's CVT-22 distribution archive.

These third-party shareware applications, and utilities may be downloaded from most local bulletin board systems (BBS), CompuServe and GEnie.

Ordering and Registering WinNAV

The documentation required to order or register WinNAV release 0.51, together with the current pricing information, is included in the following files:

PRICES.WRI	A Windows write file containing information on all current fees and charges, including multicopy discounts and site license costs
REGISTER.TXT	Additional information on how to register and order copies of WinNAV, including how to order by mail, make payment payable to, and credit card orders. This file contains special information that <u>must</u> be read before ordering.
ORDERFRM.TXT	Required order forms for use when ordering by mail

Note, the prices quoted are for the current version of WinNAV (release 0.51), and are only in effect to April 30, 1991, or the official release date of 0.60 (which ever is earlier). With the release of 0.60, a new price policy will be in effect. However, all mail orders, postmarked before May 15, 1991, will be filled at the current release price, and those who order disk sets, will receive WinNAV release 0.60. After April 30, 1991, for credit card and phone orders, and May 15, 1991, for mail orders paid by check or money order, you will be required to make payment pursuant to the new price schedules then in effect.

Please Report Bugs Before May 20, 1991

Please report all discovered bugs before May 20, 1991, either in writing or via CompuServe E-Mail, so that we may make every attempt to correct same prior to the official release of WinNAV 0.60.

Send or E-Mail reports to:

Richard S. Patterson
FlashPoint Development
P. O. Box 270492
Houston, Texas 77277

Compuserve Mail No. 70771,1336

Please do not report same by telephone.

New Features

This release introduces a new 3-D format and interface similar to PC-Tools/Shell, a batch print utility, utilities to view files within archives (double click left mouse or press return key on selected file in archive directory when Quick View window active), popup track menus (click right mouse button on list or view windows), 36 user defined function keys, the initial MS Windows online help system, internal copy functions which will create directories if they don't already exist, add/make directory function, global searches by file date and size, drive and directory statistics, and

much more. Documentation and detailed online help are presently being revised and are not included in their final form with this release.
