CAM Index - Amigaguide Version

1.1 CAM CD collection

CAM is a French-Canadian Amiga public domain collection, put together by Club Amiga Montreal. They cover most of the usual areas a normal public domain library caters for, and have an extensive back catalogue of utilities, applications, games, image disks and sound disks, most of the material being ready-to-run. Some files can also be found in other collections <such as the Fred Fish library>, however, CAM have concentrated on themed disks - by doing this, they have organised their collection in a more logical and easy-to-scan manner. Click on one of the disk ranges below to get started - search facilities within a section are available via the menus and right mouse button.
