

## CD-Master

**CDMaster** brings order in your CDROMcollection. Do you also have the problem trying to start the program in your windowsprogrammanager which is not on the CD loaded in your CDdrive ?

**CDMaster** solves this problem for you. **CDMaster** detects the CD in your drive and creates an own group for every CD, with the same name. **CDMaster** changes the groups if you change the CD.

**Multimedia-Player**

**Multimedia-Events**

### **Whats new?**

Version 1.2

New is the Multimedia-Player and the Multimedia-Events.

## Multimedia-Player

With the multimedia-player you can play all sorts of multimedia-files your computer supports. You can choose a file and play it with the 'Play'-Button. The system detects the playable Files, and you get a list of all supported multimedia-files.

### **Multimedia-files are for Example:**

- Video for Windows (\*.avi)
- Animations (\*.FLI,\*.FLC)
- Sound (\*.WAV)
- MIDI (\*.MDI)

## Multimedia-Events

**CD-Master** detects, if there is a CD-ROM, Sound-CD or no CD in the CD-drive. Here you can select a Multimedia-file for all of this groups. Please choose an event, an the Multimedia-file which should play if the event happened. The using is the same as the **Multimedia-Player**. If you choose a file from a disk, cd-rom or network, **CD-Master** asks you, if **CD-Master** should copy this file to your harddisk. If **CD-Master** will not used the file any longer, it will delete it itself.

Town: \_\_\_\_\_

I want to be registered for the fullversion of CDMASTER 1.x. I have read and understood the Shareware and Copyrightinfo. There are special prices for Students. Please send a copy of your StudentsIdentityCard. Schools and Universitys can get one registration for all their computers when paying a fee of 60 DM if their computers are mainly used in reseach and teaching. Therefor the school will get on disk of the actual programversion.

CDMaster is distributed on 3½" Disk(s).

I order     \_\_\_ Versions of CDMaster for 20 DM each             = \_\_\_\_\_ DM  
          \_\_\_ Schoolversions of CDMaster for 15 DM each       = \_\_\_\_\_ DM  
          Schoollicence of CDMaster for 60 DM each           = \_\_\_\_\_ DM  
          Postage and packaging:Westeuropa: 5. DM  
                                  other countries: 10. DM            = \_\_\_\_\_ DM  
  =====

The ammount is sent \_\_ as cheque.  
                                      \_\_ in cash.   \_\_\_\_\_

## Copy CD-Master

With this function you can make a copy of the shareware-version of **CD-Master**. It doesn't matter, if you work with the shareware- or with the registered version. Choose the destination- path, and press OK. Then **CD-Master** will copy all files of the shareware version.

## Installation

**CDMaster** does only work if it is installed on a harddisk. If you start **CDMaster** from an other drive than a harddisk, **CDMaster** asks you if you want to install **CDMaster**.

You can accept the proposed destination-path or choose an other one. The path is build up automatically and all necessary files are copied. **CDMaster** installs its programicon into the AUTOSTART and in the CD-TOOLS group of the programmanager, if you want.

**To ensure that CDMaster can detect the CDdrive correctly the MCIDriver [MCI] CDAUDIO has to be installed. For more information about the driver ask your windows manual.**

If you break off installation the program will be terminated.

## Setup

If **CDMaster** does not know the Letter of the CDdrive, it asks you about it in this menu.

In the most cases **CDMaster** detect the right letter of the CDDRIVE automatically. In this case **CDMaster** ask you if its right, otherwise you have to type in the right letter.

**CDMaster** does not check the correctness of your input ! If your input is wrong, **CDMaster** won't work correctly !

## Preferences

Within the PREFERENCES you can configure and adapt *CDMaster* in in the own way you want.

You can open the DialogueWindow "PREFERENCES" in the mainmenu of *CDMaster*.

### **CDDrive (Drivename letter):**

Here you can change the letter of your drive. If you don't make any changes conditions are the as in the setupmenu.

### **Check Intervall:**

*CDMaster* checks the status of the CDDrive in a certain intervall. Here you can set the lenght of this intervall which can reach from 1 up to 65 seconds. Every check of the status of your CDDrive needs CPU power. That means if you choose a short intervall length your computer is getting a little bit slower as if you choose a longer intervall length. Otherwise, if you choose an intervalllength which is too long, *CDMaster* detects a change in the drive status perhapse a little bit later.

Default is 5 seconds.

### **Group Name**

Here you can set the name of the group *CDMaster* is working with.

Default is: 'CDMaster'

### **Representation of the group**

Here you can choose in which way (after the change of the CD) *CDMaster* represents the actual group within programmanager

Icon: The Group is reduced to an Icon

Normal: The Group is Shown in its normal size

Big: The Group is enlarged and fills out the whole programmanagerscreen

Default is: Icon

## Function of CD-Master

Look at Chapter: Use of CD-Master

## Shareware - Information

*If you use the program frequently, please be honest and register !*

You can register for just 20 DM (+postage and packaging). Then you can use **CDMaster** legally. You receive the actual version of **CDMaster**, which maybe contains a few functions more than your Shareware version now. Copyright Conditions count for the full version in the same way as for your Shareware version.

### **It is easy to register:**

Print out the RegisterCard and fill it out in a readable way. After this, send it with the corresponding amount (cheque or cash) to me. Then, I will send the full version of **CDMaster** registered on your name to you.

## Copyright

Copyright 1993 by

**CDMaster** was programmed with Borland C++3.1. All graphics were drawn with CorelDraw, and designed with the help of CorelDrawClipart. The HelpDocuments were written with WordPerfect.

This program is distributed as **Shareware !** Please Register!

Thanx to Thomas Sautter for painting the CD in the Icon and to Oliver Annuß for translating the program into english.

Also thanx to my girlfriend Gabi for all the Sympathy.

I have programed **CDMaster** by my best knowledge, but I cannot garanty an absolute smooth working without any failures and errors. The author of **CDMaster** can not be made responsible for any kind of errors or failures occuring during the work with **CDMaster** and the author can also not be made responsible for any kinds of errors resulting out of the use of **CDMaster**.

***You use CDMASTER on your own risk !***

If you have some problems with **CDMaster** or if you have some useful suggestions about improving **CDMaster**, please contact me.

It is only allowed to distribute **CDMaster** with all its original files. These are:

CDMASTER.EXE  
MASTER-D.HLP  
MASTER-E.HLP  
CDMASTER.WAV

## Help on error

### **CDMaster does not detect any CD:**

Do you have installed the CDdriver correctly ?

Does the drive work correctly ?

Do you have installed the [MCI] CDAUDIO driver and does this driver work correctly ?

### **CDMaster does not detect a few Music CD:**

some Music CD's, especially those with some scratches, can cause problems.

## Use of CD-Master

### What is "CDMaster" ?

**CDMaster** is a tool which relieves the handling of your CDdrive. **CDMaster** creates for every CD which is loaded in your drive an individual group within the windowsprogrammanager. The highlight is that only the group which belongs to the CD in the drive is shown. All other groups are inactive. The name of the group is always the same: "CDMaster" (until you change it: Preferences).

## Uninstall

Pleas don't uninstall !

## Work with CD-Master

Please look: Use of CD-Master
