

WinJammer Version 2.30

(C) Dan McKee, 1991-94
WinJammer Software Limited

I have packaged three sample MIDI songs with WinJammer. These have all come from different sources. All of the songs are set up for use with the General MIDI setup.

PASQUINA.MID

This song uses just a piano, so it should be easy to revoice if needed. This is the song Pasquinade by L. M. Gottschalk. Larry Roberts sequenced this. Set it to your best piano, and have a listen.

MIN-G.MID

This is my sister's arrangement of Bach's Minuet in G. This came out of a realization one day that the left hand of the song contains a nice melody. After adding some frills, we wound up with this.

CHINESE.MID

This is Tchaikovsky's Chinese Dance from the Nutcracker. I sequenced this one myself, playing (then editing) each track. No changes were made to the music (at least not deliberately). This is likely to challenge most MIDI equipment as it uses a large number of voices and notes.
