MidiKeys and Playroom Software are trademarks of Playroom Software (since 1988 and 1987 respectively, published in Electronic Musician and Keyboard magazines in 1989 and 1988).

Introduction

MidiKeys is a screen representation of a piano keyboard.

It can play through the internal speaker in the PC, or it can play sounds using the Windows Multimedia Extensions if you have a sound card or an external MIDI sound generator.

MidiKeys is very useful for setting up the MIDI Mapper, it lets you audition the sounds on a sound card or MIDI sound module, and it can be fun to just bang on little melodies.

MidiKeys can now play WAV files, and allows even more fun possibilities. You can play along with musical WAV files, or add special effect to those little melodies. You can also create virtual conversations from sound bites, etc.

Registration

MidiKeys is BannerWare for our product called Makeover for Windows. The only fee for using MidiKeys is a completed and mailed registration form, and enough of your time to read some information about Makeover. The registration form is contained in REGISTER.TXT and REGISTER.WRI, and can also be printed from the MidiKeys help file.

The file containing MidiKeys should have included BROCHURE.HLP, which is an online brochure for Makeover in Windows Help format. Please take a few minutes to check out the brochure.

Open BROCHURE.HLP using the File,Run... command in Program Manager or File Manager, or open the help for any Windows program and use the File,Open... command to open the file. If HLP files are associated with WINHELP.EXE, you can just double click on BROCHURE.HLP in File Manager. If there is no HLP association, you can enter the command 'WINHELP' from the File,Run... box, and then use the File,Open... menu command in Windows Help.

About Makeover

Makeover is a collection of utilities that let you dramatically improve and/or change the appearance of Windows. Other utilities are included, but most people buy Makeover for the appearance utilities. OSFrame allows you to add 3D and other effects to title bars and sizing borders. ButtonMaker lets you edit the title bar and scroll bar buttons using a specialized icon editor. Predefined buttons are provided that mimic the Mac, NeXT, OSF/Motif, GeoWorks, and OS/2, but you can easily create your own.

Makeover is available at all CompUSA stores, and via mail order from Windows Exchange (1-800-845-1900 or 313-344-1140). It's also available through other resellers. The retail price is $39.95, but the actual price you pay may be much lower. Windows Exchange has a free shipping special in effect for at least April and May of '93.

License Agreement

This software is owned by Playroom Software and is protected by United States copyright laws and international treaty provisions. You may not modify, reverse engineer, decompile, or disassemble the software.

You may freely distribute this version of the MidiKeys software, with the following restrictions: (a) It may not be included in a software or hardware package marketed for resale without the express written consent of Playroom Software; (b) The computer archive file, diskette, or other media that contains the software must contain this document and any others originally distributed with the software in unaltered form.

In no event shall Playroom Software or its suppliers be liable for any damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or other pecuniary loss) arising out of the use or inability to use this Playroom Software product, even if Playroom Software has been advised of the possibility of such damages.

If you do not agree to the terms of this agreement, destroy all of your copies of the software. This is your sole remedy.

Should you have any questions concerning the agreement, or if you wish to contact Playroom for any reason, please write Playroom Software / 7308-C East Independence Blvd. / Suite 310 / Charlotte, NC 28227 USA / (704)-536-3093 / CIS:76702,1603.
