# What's New for Writer's Cramp

Copyright © 1994-1995 JRE Enterprises, All Rights Reserved

*WHAT's NEW V2.5*
**Enhanced** the "Import File" and "Export File" dialog boxes. These dialogue boxes will now retain the last drive:\directory and file format specified.
**Corrected** handling of non-HED files as HED files when importing and exporting files.
**Added** ability to specify page range and number of copies when printing.

*WHAT's NEW V2.4*
**Corrected** mouse cursor sticking to edge of screen. Removed ability to display help snippets by pressing the right mouse buttons.

*WHAT's NEW V2.3*
**Corrected** improper display of "No Default Printer assigned..." when a default printer is present.

*WHAT's NEW V2.2*
**Corrected** WRMAINT.EXE displaying "Unregistered Shareware" messages for registered users.
**Corrected** various SETUP program bugs.
**Included** additional vendor and ASP files.
**Provided** bypass to mouse cursor sticking to edge of screen. See INSTALL.WRI, Known Problems section for problem bypass information.

*WHAT's NEW V2.1*
**Added** 'Save As' capability to letters.
**Added** ability to change the Letter database description.
**Added** ability to toggle the display of the Tool Bar off and on from the Letter menu, (View menu item, Tool Bar sub-menu item). When toggled off, more screen space is available for editing letters.
**Added** ability to sort the LETTERS list by any column and in ascending or descending sequence. REFRESH button added to redisplay the LETTERS list in the new sort order.
**Added** the display of the Letter Database filenames to the 'Open Letter' window.
**Added** a ' Are you sure you want to delete ...?' prompt on a delete of a letter.
**Changed** 'Letters' window to highlight the selected cell, instead of putting a dotted-line around the cell.
**Modified** Writer's Cramp to follow the Association of Shareware Professionals (ASP) software guidelines for shareware. JRE Enterprises is now a member of ASP. Changes to the *unregistered* version of Writer's Cramp are:
 Writer's Cramp will no longer quit working after 60 days.
 Writer's Cramp will display "Unregistered Shareware" messages.
 Writer's Cramp will print "(Unregistered Shareware)" as a footnote.

```
     _____

     |___|___|    MEMBER
```

**Modified** Writer's Cramp to automatically display the 'Open Letter' window if Letter Databases exist *or* the "Create New Letter Database' if no Letter Databases exist.
**Modified** the way Writer's Cramp handles corrupted databases. Now you will be automatically prompted to do a repair from Writer's Cramp without having to go to the Writer's Cramp Maintenance program.
**Corrected** 'Error Code = 3197, Data has changed' bug. This correction required a database change, which will be done automatically for existing Letter Databases.

*WHAT's NEW V2.0:*
**Added** ability to insert pictures into documents.
**Added** ability to import and insert ASCII and RTF 1 files documents.
**Added** ability to cancel printing of documents.
**Added** ability to specify paragraph formats in documents.
**Corrected** 'Error Code = 3075' bug.  This bug would occur with some international date settings.
**Significantly reduced** program size of Writer's Cramp.

*WHAT's NEW V1.2:*
**Added** ability to find letters by specifying search conditions on the 'creation date', 'last modification date', and by specifying keywords that will be searched for in letters.

*WHAT's NEW V1.1:*
**Modified** the letter menus.  The menus are now more like menus found in major word-processors, with many of the same short-cut keys supported.
