Looking for an easy to use interface for modem communications with the back ground capabilities of the Windows Interface?

AceCom modem communications software combines the convenience of Windows with an appealing user interface. AceCom's Point and click Terminal Screen allows you to interact with BBS software by simply clicking in the screen.

AceCom is extremely easy to use! To place a call simply double click on an entry listed in the Phone Directory. Intelligent Auto Log In Technology can log you in to most BBS and HOST systems. Internal Zmodem, Ymodem, Xmodem and Ascii protocols interface with AceCom's internal File Manager making file transfers quick and easy. The built in file Manager can un archive your compressed downloads into the work directory for an immediate look.

Advanced users will appreciate the macro programming and script language, complete key redefinition is possible. A drop down button bar is "User Configurational" providing those extra services that only You need.

AceCom is distributed as Shareware. This means that users are encouraged, subject to restrictions described in the License Agreement, to share copies of this program with friends, associates and bulletin boards. Please remember that if you use this software you are required to pay the registration fee of \$34.95 as described in the License Agreement (LICENSE.TXT).
