Bomb Squad for Windows v1.1

(c) 1994 Orbital Software

The object of this game is simple: Defuse the bomb before time runs out. Clip two wires by clicking the terminals. You may have to clip an additional wire to complete your mission. If you succeed, you will be greatly rewarded. If you fail, well, you can be replaced...

Bomb Squad is freeware. Please pass to your friends. No registration charges apply. If you have any comments, questions, or other information, please drop us a line at the Email address above. Please contact the author for commercial distribution details, including CD-ROM or other methods.

Bomb Squad was developed using Visual Basic 3.0, Pro Edition. Graphics were created using Color It! 2.0 and ClarisWorks on a Macintosh Performa 600CD.

Orbital Software does not guarantee this software for any purpose. Use at your own risk. Don't run with scissors or pet stray dogs. Contents may have settled during shipment.

Version History:

v1.1: December 1994: Incorporated new graphics from Mac version.

Still no .WAV support

v1.0: Initial Release. Lame graphics. No .WAV support
