Installation

Installation overview.
[System Requirements](#)
[Installation Procedure](#)

System Requirements

List hardware/software requirements for setup. eg:

- | A PC.
- | Windows 3.1
- | Lots of patience.

Installation Procedure

Detail the actual steps required to install your product:

1. Insert setup disk.
2. Bring up Program Manager, select 'Run' from the File menu,
3. etc.

Your first Document/Chart/etc

Provide instructions on how to complete a simple (whatever this application is used to create).

How to #1

Explain a particular aspect of your application here. More of a "how to" than "what is".

How to #2

Another how-to chapter. Include as many of these as are necessary to cover the main things that a user is likely to do with your application.

Appendix A - Menu Reference

A description of all the menus in this application follows:

[File Menu](#)

[Edit Menu](#)

[Help Menu](#)

File Menu

The file menu is used to open and close and save files.

Edit Menu

Help Menu

Appendix B - Error Messages

Used to list the most disastrous errors your application is likely to produce, and what the user should do in those circumstances.

You should use the Context ID field to link these to a Help button on the dialog boxes warning the user about these errors.
