Technical Support Hot Line : (310) 581-3649

=====

Welcome to Go Digital Interactive Magazine. Go Digital is the first Interactive Magazine that looks to deliver the promise of CD-ROM, while keeping you entertained and up-to-date on the latest movements in the new media revolution. The interfaces are pretty understandable, but if you get confused, click the Question Mark (?) on the toolbar at the bottom of each screen to find out what to do. You'll get an active screen that describes the functions of the icons and buttons in Go Digital. Click anywhere to get back to where you were. We hope you enjoy Go Digital, and we look forward to getting your feedback. We plan to constantly improve the interfaces, interactivity, and content with each disc, so your input is important. Just email your comments/"letters to the editor" to me, **TheChief@GoDigital.com**. If you have Internet access you can upload your articles, ideas, paintings, movies, songs, or whatever, to our **anonymous ftp** site at **GoDigital.com**. We'll leave the gems there for your perusal. We may even print them. If you have access to the World Wide Web, you won't want to miss the growing and dynamic realtime version of Go Digital, online now at **http://www.GoDigital.com**. We're expecting you there soon. Please glance over these paragraphs, and if you have any questions call our technical support line at **(310) 581-3649**.

If you don't have internet access, but want to try it out, you're in luck. Included on this CD-ROM is a complete internet starter kit called InterRamp! All you need is a modem for one full week of free internet access. For further information on your InterRamp kit please read **Interamp.wri**. InterRamp customer assistance is available at (703) 904-7748. Please read Interamp.wri before calling.

=====

=====

**INSTALLATION** : To install Go Digital, run **INSTALL.EXE** in the root directory on the CD-ROM. The installation is harmless. It consists only of creating a program group and icons in the Program Manager which point to the CD-ROM drive applications. To start Go Digital, just double-click on the icon. Allow 5-15 seconds for loading. If the music occasionally suspends during operation, you need to increase the size of the audio buffer. This can be done in Control Panel\Drivers\["MCI] Sound\Setup.

**SYSTEM REQUIREMENTS**: You should have a 386-25DX or better CPU with 8-bit (256 color) or better graphics, a sound card, Microsoft Windows 3.1, DOS 5.0, and a mouse. Your PC should have at least 5MB of RAM, and a double-speed CD-ROM drive. Be sure Windows is using a display driver that will provide 256 colors (or higher). This product is not designed for 16-color displays (e.g., the standard Windows VGA driver). If your colors look bad, run Windows Setup to install the display driver provided by your video card manufacturer that supports 256 colors (any resolution). If you don't have much video memory, select "640x480 256 color" in Windows Setup. If you have problems reading any of your CD-ROMs check the CD-ROM for any scratches or finger prints. Use a soft cloth to wipe from the center to the edge. CD-ROMs are more vulnerable to damage than audio CDs, so always place them in the jewel box or CD caddies whenever possible. If memory managers such as QEMM or 386 MAX are used and the program does not

work, sometimes the creation of a system boot disk which loads only the necessary devices, all loaded low, will fix the problem.

**WARRANTY AND TERMS OF LIABILITY** Electromedia Productions Inc. makes no warranties, expressed or implied, including without limitation the implied warranties of merchantability and fitness for a particular purpose, regarding the software. Electromedia Productions Inc. does not warrant, guarantee or make any representations regarding the use or the results of the use of the software in terms of its correctness, accuracy, reliability, currentness, and otherwise. The entire risk as to the results and performance of the software is assumed by you. The exclusion of implied warranties is not permitted by some jurisdictions. The above exclusion may not apply to you. In no event will Electromedia Productions Inc., and their directors, officers, employees, or agents be liable to you for any consequential, incidental or indirect damages (including damages for loss of business profits, business interruption, loss of business information, and the like) arising out of the use or inability to use the software even if Electromedia Productions Inc. has been advised of the possibility of such damages. Because some jurisdictions do not allow the exclusion of limitation for consequential or incidental damages, the above limitations may not apply to you. Electromedia Productions Inc.'s liability to you for actual damages from any cause whatsoever, and regardless of the form of the action (whether in contract, tort (including negligence), product liability or otherwise), be limited to \$1.
