SHERLOCK For Windows

Distribution information

This is a game for the IBM PC family of compatible computers.

PROGRAM REQUIREMENTS:
 IBM PC compatible computer running MS Windows 3.x or Windows 95.
 VGA compatible display capable of 256 colors.

Sherlock: a computerized graphical version of logic puzzles

Sherlock is a game of deduction. It is your task, based upon the
information available in provided clues, to determine the locations
of 36 blocks. Every puzzle can be solved by using the clues to
eliminate possibilities until the location of a specific block can
be determined. Each player has individual setup configurations to
best adapt the game to themself.

WHO MAY DISTRIBUTE SHERLOCK:

INDIVIDUALS may freely make copies of the SHAREWARE VERSION of
Sherlock for friends and acquaintances, as long as no fee is charged.

BBS systems may also freely distribute the shareware version of
Sherlock, as long as no fee is charged besides reasonable BBS
subscription and/or connect-time charges.

ALL OTHERS *MUST* contact Everett Kaser Software for explicit
written permission to distribute the game. This permission is
usally granted to mail order disk vendors (who properly explain
the shareware concept). All other distribution methods are carefully
considered, but not always allowed.

The game package MUST include the files listed below. The individual
files may NOT be copied or distributed seperately.

        SETUP   EXE
        SHERLOCK EXE
