UMakZoo version 1.1 (c) Copyright 1997 John Raddatz

General HARDWARE and SOFTWARE REQUIREMENTS for Visual Basic Programs
Microsoft Windows 3.0 +, running in standard or enhanced mode.
80286 or higher microprocessor, 1 MB of memory & 3 1/2" floppy drive.
CGA, EGA, VGA, 8514, Hercules, or other display compatible with Windows.

INSTALL INSTRUCTIONS:
Insert disk in drive A (or whatever drive that your floppy is).
From your Windows Program Manager click on File and select Run.
Type A:SETUP & press Enter. Follow the setup instructions on the screen.
(If your floppy is B, than type B:SETUP.)
     The setup will install UMakZoo to C:\UMAKZOO unless you specify
differently. The UMakZoo icon will be placed in a JR BEAR program group.

***************** **a MOUSE IS REQUIRED for UMakZoo** *********************
   This software disk contains the program UmakZoo. It allows you to mix
and match different picture parts of animals. The parts are icons and
are not actual pictures.
   UMakZoo has three animal part sections for you to mix or match. The
sections include: head, mid, and lower. Each of the three sections will
have ten picture choices to choose from. When you have all three of the
same animal selected, the name of the animal is displayed below the
picture and (if you have a sound card installed) you will hear the
animals name spoken. To use the UMakZoo software, click on the name of
the picture in the category selected. The corresponding picture will be
displayed in the box to the right of your selection.

   UMakZoo has six menu options at the top of the screen. They can
be accessed by clicking the mouse on the menu title desired or by
holding down the Alt key and the corresponding underlined letter in the
title. Below are the menu titles.

Exit / About / Order   / Warranty / UMak Previews / KnoUr preview
            Print to printer   UMakHome
            View order form   UMakGirl
                                          ButtFace

Exit ------------------------- exits the UMakZoo software program.
About ------------------------ a breif summary about the program.
Order ------------------------ has two sub menus....
     Print to printer--------- print order form to your printer.
     Veiw order form --------- view order details on screen.
Warranty ---------------------- displays the UMakZoo warranty.
UMak Preveiws ----------------- has three sub menus....

Version 1.1 changes:
* the program group installs to JR BEAR (before UMak).

* the name of the animal is spoken (with sound card).
