----- QuizPro ----- Version 2.1.0

--- © 2000 - 2001 by Luzius Schneider ---

\*\*\*\*\*

--- A program to learn words and to compose or answer question files ---

++ SYSTEM REQUIREMENTS ++

- QuizPro runs under Microsoft Windows 95, 98, ME, NT, 2000 or higher.
- 9.8 - 11 MB space available on hard disk depending on configuration.

++ INSTALLATION ++

- Double - click the file QPInstal.exe. The program QuizPro will be installed.
- If you want to update a previous version, simply install the program into the already existing folder.
- If you would like to pass on QPInstal.exe on 1.44 MB disks, you have to distribute it with the help of Winzip or Backup on several disks.
- The true type font HebrewTH for the questionnaire "Hebrew alphabet" will be available only after you RESTART YOUR COMPUTER.
- If you already did install QUIZ on your system, it does not influence the installation of QuizPro. Both programs run independently.
- **Installation on a network:** Install QuizPro on every machine, which will be used as server or client, as described above (locally).
- Start QuizPro, select the menu item "Options/Network settings" and choose the folder on your server, where you did install QuizPro. Repeat this on every machine.
- The installation is now completed. For more information, see under Network in the help file.

++ KNOWN PROBLEMS ++

- The spell checking uses the dictionaries of Microsoft Office. If you do not have installed these dictionaries on your computer, it will not work.

++ UNINSTALLATION ++

- Choose under system|software|install/uninstall the program QuizPro, and confirm "install/uninstall".
- Most probably, there was some runtime data stored in your folder ...\\Quiz..., for example your training record. Therefore the folder has not been deleted. You have to delete it manually. After a standard installation, you find it under C:\\Program Files\\Quiz.
- You have now completed the uninstallation.

++ LICENCE ++

- **QuizPro is Shareware.** You may test it for free to see, if it fits your demands. Regular use is allowed only, if you **register it by sending us US\$ 30.--** in any convertible currency. You will then get your personal RegNo.
- For registered users of QUIZ, the price to register QuizPro is US\$ 20.--. QUIZ is a Freeware program sharing the same format of Quiz files. It is available on the author's website.
- One registration permits you to install and operate QuizPro on up to 25 computers on a local network, as long as one person is responsible for its operation. This person will typically be a teacher utilising QuizPro together with his class.
- If you have any problems with QuizPro or an idea for improvement, please let me know.
- **This software is provided as is without warranty** of any kind, either express or implied. In no event shall Luzius Schneider (the author) be liable for any damages whatsoever including direct, indirect, incidental, consequential, loss of business profits or special damages.

++ TO PASS ON AND TO INSTALL QUESTION FILES ++

- All question files are stored in the folder...\\Quiz\\Quiz Files\\ (standard C:\\Program Files\\Quiz\\Quiz Files\\). You can look there for your lately created question files, copy them, and pass them on. As well, if you want to install new question files, you simply copy them into this folder.
- You may add supplementary information to some questions. This information is saved as rich text file (\*.rtf) in the folder ...\\Quiz\\Knowledge\\. You can create such rich text files with your favourite text program or with the built in Rich Text Editor. Do not use multiple columns, header or footer.
- When passing on your question files, you are of course requested to include all information files.

++ ACKNOWLEDGEMENT ++

- Many thanks to Dr. Ted Hildebrandt for the permission to use and distribute the true type font HebrewTH.
- HebrewTH true type font Copyright © 1995 by Dr. Ted Hildebrandt
- Many thanks also to Guillermo Fernandez Rajoy, Patagonia, gfracoy@yahoo.com, who did translate the Language file (including help file and examples) to Spanish!
