

Welcome to

## Worldgroup Interactive Network

And it's Windows' software, WorldGroup Manager

The Information Superhighway just became user-friendly! You can contact a rapidly growing number of friends, products and services on Worldgroup Interactive Network.

The Help files for Worldgroup Manager include lots of general information as well as specific how-to instructions. Just double-click the Help icon in the same Program Manager group with the Worldgroup Manager icon and this ReadMe.Wri icon.

To get Started:

1. Double-click on the WorldGroup Manager Icon to open another window that displays the WorldGroup Interactive Network icon (a blue telephone).

2. Click **ONCE** on the WorldGroup Interactive Network icon to select it, then press Alt+Enter to edit the setup for your computer.

-- Ensure that the phone number to be dialed is 1-610-678-8887. (If you're in the 610 area code, remove the 1-610 and leave the 678-8887.) (Low-cost long distance service may be available by the time you read this... log on and send Email to the SysOp for information.)

-- Click the **Settings** button to select the appropriate Comm Port that your modem uses, and to select the definition file for your modem brand. (If your brand is not shown, then click on one of the Generic modem listings, selecting the one with the highest speed that your modem is capable of.)

-- In the Modem Settings dialog box is another button entitled **Options**. Select the highest baud rate that your modem is capable of. Also set the Tone/Pulse option to Pulse if your phone line does not support TouchTone. (If you don't know if your phone supports TouchTone, look at your monthly phone bill or call the phone company to review your account.)

To Register the Warranty for the EARTHwise software product:

-- Log on and click on the Polls & Questionnaires icon.

Please answer all 10 questions in the Questionnaire. If you do, you'll receive valuable Gift Certificates in the mail as our Thank You.

**GOOD HUNTING!**
