

# New Version 96

*WYSIWIG Design Interface*

*Crystal Reports 4.5*

*New Image Editor For Picture ID Cards*

*New Video For Windows Support*

## Installing Networks

If you are installing to a network, this product installed most of its files in the directory you chose the first time. Use the same disks to install other workstations. Simply keep indicating the same network drive, e.g. r:\vseries. When you install other stations, you will be allowed to skip disks 1 and 2 and just these files will be installed into each station'sr \WINDOWS\SYSTEM directory.

See H)elp , N)etworks after installation.
