### 1.2 Contents of this CD

This CD contains all the material you need to start developing software for Amiga computers. This includes:

---

- The CD<sup>3</sup> developer package. In addition to the original five disk set distribution you will find the "BuildCD" CD writer package
  - The CDTV developer package as originally distributed by Commodore Amiga to CDTV developers.
  - The Developer Conference disk sets covering all events from 1988 to 1993 in Washington, San Francisco, Atlanta, Milan and Orlando.
  - Packages contributed by 3rd parties:
    - The WBPath and ActionFSSM packages, courtesy of Ralph Babel.
    - The Envoy v2.0 developer kit, courtesy of IAM, Inc.
    - The INet 225 developer kit, version 2, courtesy of Interworks, Inc.
    - The Enforcer v37.72, courtesy of Mike Sinz.
    - MakeCD v3.1b, courtesy of Angela Schmidt.
    - The PowerUp software and developer package by phase 5 digital products, a leading manufacturer of PowerPC accelerator boards.
    - The WarpUp software package, an alternative PowerPC operating system kernel from Haage & Partner GmbH
  - Information in support of forthcoming operating system developments
  - Snapshot of the current file area on Amiga International's Web server as of 1998-03-01. Lots of useful system software, patches, development guidelines and contributions by other developers.
  - Additional developer material:
    - BOOPSI gadget and image classes
    - The AmigaOS 2.04 example code, as part of the original 2.04 Native Developer Kit
    - The RKM 2.04 code examples
    - The complete set of registered IFF forms
    - IFF example and stress test files
    - All IFF packages released by Commodore-Amiga, Inc., covering 1986 through 1992
    - The camd v37.1 MIDI developer kit
    - The SANA-II standard package and developer kit
    - The Installer v43.1 package
  - International support material:
    - Sample text using the full ISO-8859-1 character set
    - Translation guidelines
  - The updated 3.1 Native Developer Kit:
    - 'C' and assembly language header files, linker and runtime libraries
    - System documentation and tutorial texts
    - Example code covering the AmigaOS 3.0 and 3.1 features
-

- The NewIFF v39 package
- The AmigaGuide and DataTypes documentation and example code
- The original 3.1 Native Developer Kit
- The original 2.0 Native Developer Kit
- The original 1.3 Native Developer Kit
- Reference material:
  - The collection of AmigaGuide Volume 1 articles, covering Spring 1987 through January/February 1989
  - The complete AmigaGuide Volume 2 articles in AmigaGuide format, covering January/February 1990 through March/April 1993; also included are the printable issues in PostScript and PageStream format
  - Hardware related articles
  - The Includes & Autodocs in AmigaGuide format.
  - The Amiga ROM Kernel Reference manuals, 3rd edition, in AmigaGuide format.

Please note that you will still need a 'C' compiler or assembler, etc. to develop software for Amiga computers, none of which is included on this CD.

## 1.5 Notes on the CD contents

The contents of this CD were prepared for reading with the `MultiView` utility, which is part of Workbench 3.0 and 3.1. If you plan to read the CD under older Workbench and AmigaGuide releases, you may experience difficulties.

Most electronic mail and postal addresses mentioned in the documents found on this CD are outdated. `cbmvax` went offline long ago, the `commodore.com` domain is no longer operational, the Commodore-Amiga Technical Support (CATS) group no longer exists and Commodore-Amiga, Inc. and its former subsidiaries went out of business. ESCOM AG is no longer in business. If you direct your inquiries to any of these outdated addresses you cannot expect to get any answer back. Use the addresses given

here  
 to contact

Amiga International Inc. instead.

## 1.6 Liner notes

The contents of this CD were edited and compiled by Franz-Josef Reichert from original material found in the Commodore-Amiga Technical Support (CATS) archives, the 1992 "CATS Developer CD v2.0" and the Amiga Developer CD 1.1 compiled by Olaf Barthel. It incorporates technical notes, tools and additional material contributed by various people and companies.
