ProgressView

ProgressViewPalette contains example code for a simple progress meter. This project shows how to palettize a view class and how to add an IB inspector for this object. This example was adapted from NeXT documentation titled **Development Tools and Techniques**.

ProgressViewPalette contains 3 objects:

ProgressView   A simple subclass of NSView that displays progress by filling a horizontal bar, representing percentage complete.

ProgressViewPalette   A subclass of IBPalette.   This file also contains a category

on ProgressView which specifies its inspector class.

ProgressViewInspector	An subclass of IBInspector which sets the percentage increment for a ProgressView.
