

Your Call Demo

The **YourCallDemo** application is included on the Advantage disk to give you a feel for the application built in "Step-By-Step Through a NeXTSTEP Application." This demo application includes a small enhancement—a Review Calls feature that lets you review the call records contained in the sample database. This project includes the following source file changes from the simple **YourCall** application:

CallReviewer.[hm]

A subclass of CallController that implements the Review Calls feature. An instance of this subclass replaces CallController in the YourCall.nib Interface Builder file.

In addition, the project's Interface Builder file is modified to include a "Review Calls" menu item and a panel to let the user step through the call records in the database one-by-one.
