

Your Call Services

The **YourCallServices** application works as described in "Extending the Advantage." This project includes the following source file changes from the simple **YourCall** application:

CallService.[hm]

A subclass of CallController that implements the service provider feature of **YourCallServices**.

services

Required to advertise the service offered by the **YourCallServices** application.

In addition, the project's Interface Builder file is modified to include a "Services" menu item.

The steps for creating this project are described in the source code listings in *The NeXTSTEP Advantage*.
