SOFTIMAGE® TOONZ is a complete 2-D eel animation solution. The software tool automates the production steps of the traditional 2-D eel animation studio, without compromising the animator's original drawing style and skill. SOFTIMAGE TOONZ's software modules offer a powerful set of utilities for the input, inking, compositing, rendering and recording steps of traditional eel animation. Users benefit from greater production speeds and reduced production costs. SOFTIMAGE TOONZ can be used with SOFTIMAGE 3-D and SOFTIMAGE EDDIE.

IRIX version compatibility:
