Softline Resumé - Version 3.3

Job hunting in the 90's!. A slide show program that talks with your own voice!. **Softline Resumé** does not require any extra hardware to play back the sound files - operates through the **PC internal speaker** (Windows 3.0 or 3.1 / standard or enhanced modes) or installed **sound device** (Windows 3.1).

Resumé helps you assemble a Windows compatible electronic resumé (talking floppy disk) and distribute them (royalty free) to potential employers. Automatically accesses a Windows Write file from within the program for detailed, written information (your resumé) on yourself. The employer may print out your information from Windows Write. Includes InWin: Windows utility program for an easy end-user installation. You may customize InWin for your particular resumé and distribute freely (only with your Resumé) or simply run the program from the floppy drive. Grab their attention with a Talking **Resumé!**

Passed: Microsoft Compatibility Testing for Windows.

Requires Microsoft Windows 3.1, Sound board, and microphone to create the sound files. Windows Paint or some other third party graphics creation software (save as .BMP files) to develop the picture files.

Licensed Version - **\$29.95**

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, and technical support.

Softline Brochure - Version 3.3

Advertising in the 90's!. A slide show program that talks with your own voice!. **Brochure** is a commercial advertising tool for companies who want to communicate a promotional message to the Windows market. **Softline Brochure** does not require any extra hardware to play back the sound files - operates through the **PC internal speaker** (Windows 3.0 or 3.1 / standard or enhanced modes) or installed **sound device** (Windows 3.1).

Assemble your talking **Brochure** and distribute it freely (no royalties) through tradeshow, mass mailers, hand outs, bundle with hardware, etc.. Up to 100 picture and sound files in one show!. **Brochure** automatically accesses a Windows Write file from within the program for detailed, written information (ie: product catalogue, pricing, service bulletins, new product announcements, etc.). The person to whom you hand your computerized brochure may print out your detailed information from within Windows Write. Includes InWin: Windows utility program for an easy end-user installation. You may customize InWin for your particular Brochure and distribute freely (only with your Brochure) or simply run the program from the floppy drive. Penetrate those tough accounts with a Talking Brochure!.

Passed: Microsoft Compatibility Testing for Windows.

Requires Microsoft Windows 3.1, Sound board, and microphone to create the sound files. Windows Paint or some other third party graphics creation software (save as .BMP files) to develop the picture files. Licensed Version - **\$99.95**

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, and technical support.

Look and Listen Series - Version 5.0

A pre-school, instructional slide show program series that talks through the **PC internal speaker** (Windows 3.0 or 3.1) or installed **sound device** (Windows 3.1). Great for teachers and parents to introduce their young students to the wonderful world of learning. Colorful pictures with associated sound files will grab the child's

attention. Learn ABC's, Counting, Opposites, Shapes, Colors, about Animals and Dinosaurs. Includes Sound and Loop adjustment dialog boxes. Turn the Sound OFF, adjust the delay between pictures, and test your students' knowledge. Have more fun re-coloring the existing picture files from within Windows Paint. Use that home computer and get that child started with "Look and Listen"!.

Passed: Microsoft Compatibility Testing for Windows.

Requires: Microsoft Windows 3.0 or 3.1 in Standard or Enhanced modes.

Licensed Version - each program - \$ 9.95

Get all 7 Look and Listen programs for..... - \$39.80

(10MB hard disk space is required)

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, and technical support.

Talking Slideshow - Version 3.3

A slide show program that talks with your own voice!. Simply substitute your picture and sound files for the Softline files. Assemble your own professional presentations for tradeshows, business meetings, training seminars, etc.. Includes Sound and Loop adjustment dialog boxes. **Talking Slideshow** does not require any extra hardware to play back the sound files - operates through the PC internal speaker (Windows 3.0 or 3.1 / standard or enhanced modes) or installed sound device (Windows 3.1). **Talking Slideshow** is similar to **Picture It With Sound** except it does not Auto-stretch/shrink the picture files. If you will be using scanned photographs and/or 256 color or higher picture files, then **Talking Slideshow** should be ordered instead of **Picture It With Sound**. Auto-stretch/shrink tends to distort high resolution picture files. Up to 100 picture and sound files in one show!.

Passed: Microsoft Compatibility Testing for Windows.

Requires Microsoft Windows 3.1, Sound board, and microphone to create the sound files. Windows Paint or some other third party graphics creation software (save as .BMP files) to develop the picture files. Licensed Version - \$ 9.95

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, and technical support.

Picture It With Sound - Version 5.0

A slide show program that talks with your own voice!. Simply substitute your picture and sound files for the Softline files. Create your own lessons, tutorials, and other works like the "Look and Listen" programs. Includes Sound and Loop adjustment dialog boxes. **Picture It With Sound** does not require any extra hardware to play back the sound files - operates through the PC internal speaker (Windows 3.0 or 3.1 / standard or enhanced modes) or installed sound device (Windows 3.1). Features picture file Auto-strech/shrink. Up to 100 picture and sound files in one show!.

Passed: Microsoft Compatibility Testing for Windows.

Requires Microsoft Windows 3.1, Sound board, and microphone to create the sound files. Windows Paint or some other third party graphics creation software (save as .BMP files) to develop the picture files. Licensed Version - \$ 9.95

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, and technical support.

Softline World Clock for Windows - Version 4.0

A Windows global time program that displays a colorful map of the world and tells the time for any particular time zone, relative to your selected "home" time zone. Great business utility, as well as an educational tool for teaching children about Time Zone relationships. Major cities with current date/time, are scrolled in a Ticker Time Bar - updated every minute and may be toggled On/Off. The Title Bar contains your local Day/Date/Time - updated every second. The Map clocks provide a quick

reference to the local time in nine different cities around the world and are updated to the minute. Double click on the map for the current time in any of the 24 Time Zones.

The Auto-Stretch/Shrink feature sizes the World Clock map to fit anywhere onscreen. "Always on Top" command to keep the World Clock window in the foreground. On-Line Help <F1> for countries on daylight Savings Time, Odd-Hour, and Special Exceptions as well as command explanation/selection. Includes InWin: Windows utility program for an easy install within Windows. Substitute your own colorful map of the world for the Softline map Requires .BMP format and some adjustment for Time Zone alignment. Softline World Clock; a great addition to your library of Windows utilities!.

Requires Microsoft Windows 3.0 or higher in Standard or Enhanced modes.

Licensed Version - \$ **14.95**

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, extended font capability (Windows 3.1 users only) and technical support.

Softline Ticker for Windows - Version 4.0

Softline Ticker is a single-user, Windows 3.0/3.1, scrolling message posting program. The user can insert the current contents of Windows Clipboard under the message for added effect. Up to 5 separate messages can be saved, each up to 450 characters long. "Always on Top" feature will insure any individual will see the message. Speed feature controls the scroll rate. All commands are accessed through the Control Box Menu. Extended Help file is included (Press <F1> key). Create a ticker tape message on your computer screen to let co-workers, Mom, Dad, siblings, wife, husband, etc. . . . just about anyone know What, When, Where, and Why. Use Ticker with any Windows compatible screen saver to leave messages on your system while you are away. Includes InWin: Windows utility program for an easy install. A handy utility that no system should be without!.

Requires Microsoft Windows 3.0 or higher in Standard or Enhanced modes.

Licensed Version - \$ **9.95**

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, Picture (.BMP file format) load capability, extended font capability and technical support.

Ticker for DOS w/ Source Code - Version 4.0

Scroll a message across any line on your screen. You may position the message on any line (1 - 24) of your computer screen. Leave a detailed message on your screen while you are away. Registered users will be sent the executable as well as the Pascal source code for Ticker for DOS.

Requires DOS 3.1 or higher.

Licensed Version - \$ **19.95**

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, and technical support.

Read - Version 7.0

A simple ASCII file viewer for DOS 3.1 or higher. Use it to communicate specific instructions to your users - great tool for developers and shareware vendors. The program includes 8 keyboard commands to move around the file(s) and exit to DOS. Read is available for licensing to single users and commercial (redistribution/bundling) users.

Requires DOS 3.1 or higher.

Licensed Version (Single User) - \$ **9.95**

Licensed Version (Commercial User) - \$ **199.95**

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, and technical support.

InWin - Version 4.0

InWin is an global installer for applications and files running under Windows versions 3.0 and 3.1 or DOS applications/files installing into the Windows environment. InWin eliminates any problems that even an inexperienced end-user may encounter. This equates to less anxieties from your customer, increased productivity, and a positive introduction to your product.

Targeted at Software Developers/Authors and Shareware Vendors, InWin offers the following functions and capabilities: error checking and informational dialog boxes, display your headers, footers, title, program name, and final dialog box instructions, point and click end-user Help available within InWin, use your favorite DOS Self-Extracting Executable compression routine, global directive option to install specific files to the Windows Directory or Windows System Directory, Automatically append Autoexec.BAT and/or Config.SYS, change/Add specific parameters within System.INI and/or Win.INI files, "Gas Gauge" indicator for current Percentage complete of your install process, up to a 10 diskette install, less than 50kb diskette space required for InWin, quick and easy installation changes through the script file.

Requires: Microsoft Windows 3.0 or 3.1, Windows Notepad or some other standard ASCII file editor.

License Fee per Application - **\$ 99.95**

Licensed Fee (3 or more Applications) - **\$299.95**

The licensed version fee includes a manual, removal of pester screen(s), the most current version of the software, and technical support.
