"This is the most controversial and darker side of the alien subject. The conspiracy theory involves governments throughout the world in probably the biggest coverup known to man. By denying the exsistance of alien life and actively following a secret agenda involving alien communication, testing alien technology either retrieved from crashed UFO's or by trade and holding captive alien beings. This goes back to the days of Roswell in America, and without a doubt many decades further back in our history".

ROSWELL PAGE

"In 1947 the people of Roswell witnessed the crash of a UFO in the surrounding desert, the US government threatened residents of this small town to keep quiet. The government claimed the object was simply a new type of secret weather balloon, and not the metallic alien ship and dead and living extraterrestrial creatures everyone else believes to be case. Books and films been produced based on this conspiracy, there are still many living witnesses today. Apparently the confidential film footage of the Roswell alien autopsy was obtained from top security Nasa archives, but whether of not this will be shown on national television is another matter".

UFO SIGHTINGS PAGE

"Common place, literally hundreds are reported each year, many can be explained by logical means, often confused with aircraft, weather balloons or satellites. However video footage of objects traveling great speeds and performing agility unlike any aircraft on this planet are a different matter altogether. Plenty of clear photographs of unearth like craft again prove that some of these sighting can not be confused".

Aliens Confidential is the most comprehensive study of the UFO and Alien phenomena especially put together for the Amiga computer.

Since it is impossible to prove that all the images and text files are genuine we can only guarantee we have done our utmost to use as reliable sources as possible.
