

# Jeremy's Power Countdown CSM 1.0.2

## What is it?

Power Countdown CSM is a Control Strip Module that shows the remaining time before the various power conservation features kick in.

Next to each icon indicating a specific power conservation feature (disk spindown, screen dimming, system sleep) is a bar indicator that illustrates the amount of time before that power conservation feature becomes active.

## Compatibility

The Power Countdown CSM will work on any Macintosh that supports a recent version of the Power Manager Dispatch software. When this manual was prepared, this included:

- PowerBook 190 series
- PowerBook 5300 series
- PowerBook 1400 series
- PowerBook 2400 & 3400 series
- Performa 5400 series
- Performa 6400 series
- Power Macintosh 7200 series
- Power Macintosh 7500 series
- Power Macintosh 7600 series
- Power Macintosh 8500 series
- Power Macintosh 9500 series
- PCI-based Power Macintosh Clones (Power Computing, UMAX ,etc.)

## Installing the Power Countdown CSM

If you are using Mac OS 8.5 or earlier, you must drag the Control Strip Module to the Control Strip folder inside your System folder. If you are using Mac OS 8.6 or later, the Mac OS will recognize the Control Strip - merely drag it to your System Folder, and the Mac OS will move it automatically for you.

With Mac OS 8.5 or earlier:

- 1) Open your System folder.
- 2) Copy the Control Strip Module to the Control Strip Folder in your System folder.
- 3) Restart your computer.

## Configuring the Power Countdown CSM

Once you've installed the Power Countdown CSM, you can configure it to match your personal preferences.

## popup menu

The popup menu lets you control the appearance of the Control Strip.

### Display drive spindown countdown

Display the icon and indicator for drive spindown time.

### Display screen dim countdown

Display the icon and indicator for screen dimming time.

### Display sleep countdown

Display the icon and indicator for system sleep time.

## Revision History
