Comment

These are the icons of Palm IIIc (Color PDA from Palm Computing). First I thought it would be difficult to make Palm IIIc icons, but actually it was not. It took about one day to create these icons.

To express the delicate curve, I used some grey colors for the outline. So I have enclosed 32bit icons so that you can put it on the dark desktop without seeing such light grey outline.

Your comments are always welcomed. Please drop an email to <hide@pixture.com> :-)

Legal Stuff

The enclosed icons were created from scratch by Hide Itoh. You may distribute this icon set provided you keep the set intact, including this read me file and do not charge or request fees or compensation of any kind. It's freeware, but this does not mean you can use it for whatever purposes.

These icons may not be used for any commercial purposes. If you want to put this archive to CD-ROM that comes with commercial books, magazines, etc.. , you are required to contact the author and must get the written permission in advance.

If you want to use these icons for your personal home page, please drop me an e-mail and let me know the URL of your personal page. Your comments are always welcome.

Tools I used to create this icon set

ResEdit - for 256 color icons

Iconographer - for 32bit icons
