### Comment

These are the icons of PowerBook G3 2000 (Pismo). I created them a couple month ago, but I have not finished off them since I did not like them. It's very difficult to express delicate curve of PoweBook G3, and I used some gray colors to the border to express the curve. Myabe, it would be better to go 32bit icons for the object like this. Anyway, I have decided to release them although I am not satisfied with the finish.

### Legal Stuff

The enclosed icons were created from scratch by Hide Itoh. You may distribute this icon set provided you keep the set intact, including this read me file and do not charge or request fees or compensation of any kind. It's freeware, but this does not mean you can use it for whatever purposes.

These icons may not be used for any commercial purposes. If you want to put this archive to CD-ROM that comes with commercial books, magazines, etc.. , you are required to contact the author and must get the written permission in advance.

If you want to use these icons for your personal home page, please drop me an e-mail and let me know the URL of your personal page. Your comments are always welcome.

Tools I used to create this icon set

ResEdit only.
