INSTALLATION
Insert your NFL 75 CD-ROM To your CD-ROM drive run install.exe by chossing run in the file menu and typing "X:\INSTALL" (where X is the CDROM drive Letter) file and follow the orders during the installation process.

BEFORE STARTING UP
In order to improve this software's performance make sure that it have as much System Resources as possible available, by closing all other applications.

You should also have VIRTUAL MEMORY enabled for Windows 3.1. To operate this feature double click on the "386 Enhanced" icon in the Control Panel, and select the "Virtual Memory" button. Make sure that the virtual memory size is at least 6MB.

STARTING THE APPLICATION
Double Click the NFL 75 Icon at the NFL 75 Group on your desktop.

USING THE INTERACTIVE VIDEO PLAYER (TM)
As The interactive video player image appears, you can just click the "PLAY" Button and enjoy the product or click the help button (?) and follow the instructions.

IMPROVING PERFORMANCE
If you encounter any performance problems such as the video going to slow or interactions take too long, try to remove all other applications, such as windows programs and TSR programs. If this does not help, try to replace the video card driver to a 256 color driver.
