TREASURE QUEST SETUP & INSTALLATION

Treasure Quest uses a new type of video codec called "Motion Pixels" to play Windows AVI files. To install "Motion Pixels" and the Treasure Quest interactive demo:

1. Place the CD-ROM disc in the drive.

2. In Windows Program Manager, select "File", then "Run". If using Windows '95, go to the "Start" button in the taskbar and select "Run"

3. In the Run Dialog box, type {CDROM Drive}\SIRIUS\SETUP.EXE

4. Follow the installation instructions during the Motion Pixels setup program using all the defaults.

5. To run the Treasure Quest demo, double-click on the "Treasure Quest Demo" icon in the Motion Pixels program group. The demo takes about one minute to load into memory.

6. The Treasure Quest video clip will start playing automatically. The video clip uses Video for Windows. If you get an error message that states something like "CANNOT FIND MSVIDEO.DLL" Run setup from the \SIRUS\VFW11D directory and restart the demo.

7. You can use the interactive buttons underneath the video window to stop, play, advance one frame, reverse one frame, or skip back to start.

8. Click on the "?" button for help, click on "Technical Support" for the Sirius Publishing Technical Support hotline, click on "TQ on the NET" for information on installing the SiriusNet software. Click on "Exit" to leave the demo.

SYSTEM REQUIREMENTS

486 DX2 66Mhz or higher CPU 8MB RAM Local Bus or PCI video adapter set to at least 32,768 colors 2x CD-ROM or higher Sound Blaster or 100% SB compatible sound card

Please review the following information concerning Motion Pixels

Motion Pixels 2.49 release - 18 December 1995

CONTENTS

Web Site Information Fullscreen Playback Information Microsoft Windows NT Information Microsoft Windows 95 Information

WEB SITE INFORMATION

Motion Pixels is on the World Wide Web at http://www.motionpixels.com. Consult the Web Page for the latest information, evaluation software, and video clips.

FULLSCREEN PLAYBACK INFORMATION

If the video will not play fullscreen, load a VESA driver for your video adapter. If you do not have one, contact your video adapter manufacturer.

MICROSOFT WINDOWS NT INFORMATION

The Motion Pixels player and compressor is not currently supported under Windows NT.

MICROSOFT WINDOWS 95 INFORMATION

It has been observed that screen savers will interrupt video playback. To prevent this, please disable your screen saver.

It has been observed that network support will cause frequent system pauses. If your video playback pauses then disabling your network support should correct this problem.
