Information on this OsoSoft Shareware Disk

Programs for Windows 3.1 are in ZIP files in the root directory.
Each program's documentation is in a WRI file with the same name
as the EXE file for that program. Complete installation
instructions for the program are in that WRI file. The
registered versions include automated installation.

All programs on this disk require VBRUN300.DLL, contained in
VBRUN300.ZIP. This file should be placed in your WINDOWS\SYSTEM
directory.

Shareware Vendors must read and comply with the distribution
requirements contained in the VENDOR.DOC file.

Program information is in PROGINFO.TXT.

Information for reviewers is in REVIEWER.DOC

Thank you for your interest in OsoSoft programs.

OsoSoft Shareware Programs

INTRODUCTION

The files on this diskette are the latest versions of several
Windows 3.1 programs from OsoSoft. All files replace all previous
versions of the same programs.

VBRUN300.DLL

All OsoSoft Shareware Windows 3.1 programs on this BBS require the
VBRUN300.DLL library from Microsoft Visual Basic 2.0. That file is
contained in VBRUN300.ZIP on this diskette. You need only one copy
to run all OsoSoft and many other programs for Windows 3.1.

NEW PROGRAM! NEW PROGRAM!
Prompter 1.2 for Windows

Public speaking is a chore, at best. Prompter is designed to make

that chore as light as possible. Like a professional teleprompter, the program offers automatic scrolling of your speech at any rate you choose. Fonts and font sizes are completely changable. An elapsed time counter helps you keep on track, too.

But there's more! Prompter includes a complete speech editor, with a capacity of one hour's worth of text. A single command lets the speechwriter determine the exact time the speech will take to deliver at any stage.

Speeches can also be printed in any font and font size, and printouts offer automatic header lines. Prompter learns your speech pacing and saves that information for you on command.

While using Prompter on the lectern as a prompting device, pressing any key instantly pauses scrolling. Press another key and scrolling begins again. Scroll rate is adjustable with a press of the Plus or Minus keys during speech delivery.

Prompter is a program no public speaker or speechwriter can do without. Since registration is only $25, there's no excuse for not using Prompter.

Prompter's Features

Use any Font
Any Font Size
Variable Scroll Rate
Complete Editing Tools
Elapsed Time Counter
Delivery Time Estimator
Print Speeches
Imports any ASCII File
Instant "any" Key Controls

System Requirements: Windows 3.1 in Enhanced Mode, 2 MB RAM, hard disk, mouse, VGA or better.

Price: $25 Shareware Registration

NEW PROGRAM! NEW PROGRAM!
AdMaker 3.5

If you ever need to design small display ads for your business or for others, you know what a pain the job can be. Using a program not specifically designed for the job means complicated setups, time-wasting extra tasks, and worse.

AdMaker 3.5 is designed to create these ads. That's all it does. Using a WYSIWYG display window and an easy-to-use interface, you can create ads up to 7.5 X 9.5 inches in size, complete with up to 4 PCX or BMP clip art images, line, box, and circle drawing tools, with background fills. Use any TrueType or ATM font, either plain or reversed or even rotated up to 90 degrees in either direction.

Get this program if you ever use or create ads! You'll have your
layouts finished in minutes, ready for publication!

Here's a list of some of AdMaker's powerful features:

Easy Interface, Familiar to Rockford! and MultiLabel Users
Layouts up to 7.5 X 9.5 Inches
100% and 200% Size Printouts
Automatic Crop Marks
Save Dimension Templates for Future Use
Up to 4, Scalable PCX or BMP Images
Layout Grid Display
Zoom Command for Large Ads
Position Text with a Mouse Click
Rotate Text
Insert Special Characters
Right Click on Any Command for Help
Create Filled Boxes
Print Text over Graphics
Use Formatted Serial Numbers
Save and Load Template Files for Custom Labels
Enter Dimensions in Any Measurement System
Prints Out Customized Text and Customer Approval Lines

System Requirements: Windows 3.1 in Enhanced Mode, 2 MB RAM, hard
disk, mouse, VGA or better, graphics-capable Windows printer.

Price: $30 Shareware Registration

Fonter 6.2

NEW IN VERSION 6.2!

Fonter now lets you preview and install TrueType fonts from any
drive, even CD-ROM and Network drives. You can install fonts
temporarily, just for the current Windows session, or permanently.
Also, Version 6.2 lets you see font metric details.

TRADITIONAL FONTER FEATURES!

Fonter lets you view and print Windows 3.1 TrueType and Adobe Type
Manager fonts in several ways. Onscreen, you can view any font,
complete with a font sample window showing text in that font. A
full-screen view allows Zooms on three levels, and displays the
entire character set. You can also view an onscreen ANSI grid, and
a keyboard simulation for any font. Both of these displays can be
printed with a mouse click. Another feature allows users to create
BMP clip art files for any character in 72 point size. This is
especially useful for creating clip art images of dingbat and
symbolic characters.

Printing features include font lists, with samples for all or
selected fonts. Users can also print full page font samples,

showing multiple sizes, etc. A full-page ANSI chart is another
printing option. For convenience, users may automatically print
complete font books for all fonts installed on their system.

System Requirements: Windows 3.1 Enhanced Mode, 2 MB RAM, mouse,
hard disk, VGA or better, printer.

Price: $20 Shareware Registration

MultiLabel 3.5

NEW FEATURES IN VERSION 3.5
MultiLabel introduces many new features in this latest version.
You can now:

Print Text and Graphics in COLOR!!!
Position Text with a Mouse Click
Rotate Text
Insert Special Characters
Right Click on Any Command for Help
Create Filled Boxes
Print Text over Graphics
Use Formatted Serial Numbers
Save and Load Template Files for Custom Labels
Enter Dimensions in Any Measurement System
Import Comma-Delimited Files from Other Programs
Print Entire Sheets of Labels from One Address Book Entry
AutoFit Makes Long Address Book Fields Fit on The Label
Create Large Labels and Zoom the Display
Create PostCards, Name Tags, Rolodex Cards
USE ANY AVERY LABEL TYPE!

TRADITIONAL MULTILABEL FEATURES

MultiLabel lets users create customized labels, complete with clip
art, any TrueType or ATM font or text alignment and line drawings,
using Windows 3.1 and any graphics-capable printer fully supported
by Windows. Labels can also include automatic serialization on
duplicate labels, character formats inserted in lines of text, and
automatic bullets. Users can insert up to 2 PCX or BMP clip art
images, with full scaling and positioning control. Custom text
alignments and a grid overlay allow precise placement of text and
graphics. Built-in line, circle, and box-drawing tools add
flexibility. A WYSIWYG display of the label is always visible. The
program automatically supports all Avery Laser Label formats or
users can create customized label sizes.

There's even an Address Book module which holds up to 750 5-line
entries in each data file. Field codes inserted in the label allow
full merge capabilities. Full search tools aid in record selection.
Users can print all or selected addresses or any other data stored
in the Address Book on the labels, along with other text. The
program supports all Windows-compatible printers, including
PostScript and Dot-matrix devices.

System Requirements: Windows 3.1 in Enhanced Mode, 2 MB RAM, hard disk, mouse, VGA or better, graphics-capable Windows printer.

Price: $20 Shareware Registration

Rockford! 3.5

NEW FEATURES IN VERSION 3.5
Rockford! introduces many new features in this latest version.
You can now:

Print Text and Graphics in COLOR!!!
Position Text with a Mouse Click
Rotate Text
Adjust Left and Top Margins to Match Pre-Printed Card Stock
Insert Special Characters
Right Click on Any Command for Help
Create Filled Boxes
Print Text over Graphics
Use Formatted Serial Numbers
Enter Dimensions in Any Measurement System
Print Vertical or Horizontal Cards on Pre-Scored Stock

TRADITIONAL ROCKFORD! FEATURES

Rockford! is the premiere business card design and printing program for Windows 3.1. Users can design and print professional-quality business cards, complete with clip art, all TrueType and ATM fonts and text alignments, and line drawings created with the internal drawing tools. Four border styles are also available. Users can insert up to 2 BMP or PCX clip art images, with full scaling and positioning. A WYSIWYG display of the card is always visible. Users can print 200% layout sheets or four-up layouts to take to print shops, or print sheets of ready-to-cut cards on card stock paper. Rockford! also supports All styles of pre-cut card stock available from several sources for ready-to-use cards. Fine adjustments in printing allow compensation for printer variations.

You also get full support for both PCX and BMP files, support for all Windows-compatible printers, including dot-matrix and PostScript devices, and an on-screen layout grid plus precise positioning of text and graphics. There's even a link to Windows PaintBrush for easy editing of clip art images.

System Requirements: Windows 3.1 in Enhanced Mode, 2 MB RAM, hard disk, mouse, VGA or better, graphics-capable Windows printer.

Price: $20 Shareware Registration

NOTE: Rockford Professional, available for $30, includes additional clip art, plus customer sign-off areas and user advertising messages on layout sheets.

WinClip 3.5

NEW FEATURES IN VERSION 3.5

NOW DISPLAYS GIF FILES!
AutoZoom Fits any Image into The Viewing Window
Prints 1" Proportional Thumbnails in Catalog for Uniformity
AutoShow Steps Through an Entire Directory at Any Time Interval

TRADITIONAL WINCLIP FEATURES

WinClip is the ideal Windows 3.1 clip art cataloging program. With
it, users can preview BMP and PCX images in 1, 4, 8, and 24-bit
formats on any display adapter. Full scrolling and zoom features
make previewing images easy. Printing options include printing of
individual images, selected images, or entire directories of
images. All printouts have a binding margin, and include file and
directory names. Zoom percentages allow printing at any scale.
Additionally, a double click on an image or filename load the image
into a bitmap editor of the user's choice.

You can view BMP, PCX and now, GIF files, support for all
graphics-capable Windows printers, including dot-matrix, COLOR, and
PostScript devices, and powerful management tools. File management
is one of the key features. Users can copy, move or delete single
files or selected files. This lets the user manage clip art files
by moving and copying them into selected directories for easy
access. CD-ROM support too.

System Requirements: Windows 3.1 in Enhanced Mode, 2 MB RAM, hard
disk, mouse, VGA or better, graphics-capable Windows printer.

Price: $20 Shareware Registration
