

Now we're monthly!

Just a reminder that CD-ROM Today and The Disc are now being published on a monthly basis-- that means twelve magazines and discs a year for you to enjoy. Don't miss a single page or a single byte!

DISC! #6 was supposed to contain the DK Multimedia demo for both Mac and Windows, but due to some misplaced files only the Mac version was complete. The DK programs are so arresting that we felt everyone should get the chance to view them so we're including the complete Windows demo on DISC! #8. We hope you enjoy looking at this exciting demo as much as we did.
