Late-breaking news....

As we were about to go to press, several changes occurred in our contents list -- one item dropping out and a couple of nice surprises dropping in.

First, LucasArts had been rushing to get us an interactive "talkie" demo of Sam & Max Hit the Road. But, at the last minute technical problems delayed its arrival in finished form. We'll plan to bring you the irrepressible Sam & Max on our next Disc!

About the same time, Velocity came through with the Remind Me personal reminder system, using the Looney Toons cast of characters in a limited use version of this amusing and useful utility.

Also, the Endangered Species PowerCD sample from ZCI and the Wired for Sound Windows utility both became available.

You'll also find a great array of top shareware and freeware on this Disc! -- some really outstanding stuff.

There is a host of other nice surprises awaiting you in this issue of The Disc! -- some Easter Eggs that we're sure you're going to enjoy discovering.
